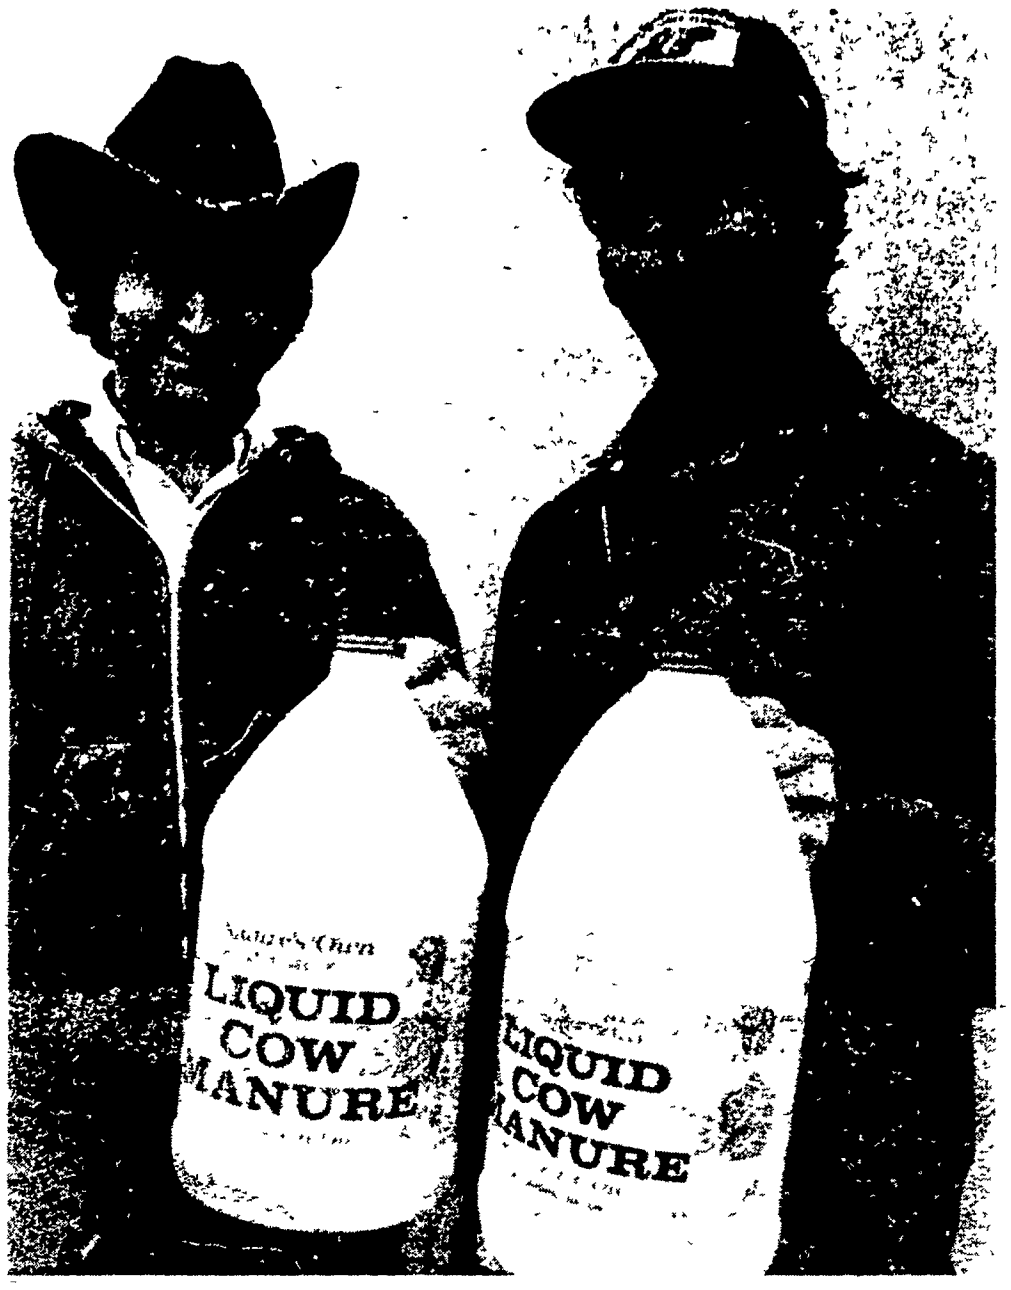
Lancaster Farming

Serving The Central and Southeastern Pennsylvania Areas

Vol. 20 No. 10 | Lancaster Farming, Saturday, January 18, 1975 | $2.00 Per Year

More Profit From Manure Than Milk



Richard Hoppes, right, and his brother Roy, Hamburg RD2, are partners in a liquid cow manure operation which they expect to be more profitable than milking. Much of the product is sold in gallon bottles, but bulk deliveries will soon be made via barge to the Arabian desert.

At a time when milk is selling for a blend price of around $9 a hundredweight, Richard Hoppes, a Berks County dairyman, is getting $27 a hundred for the liquid manure from his 60 cow herd. Manure production from Hoppes' herd totals 70,000 pounds per month, a figure which includes waste water from the milk house, the parlor and a little rain.

The cows produce about as much manure as they do milk, which means Hoppes is getting three times as much money for his herd's manure production as for their milk. Bottled for sale, "Nature's Own Deodorized Liquid Cow Manure" retails for $2.89 a gallon. It's a topsy turvy world, and Hoppes and his brother Roy, a partner in the franchise, expect to profit handsomely from their liquid manure business.

"I wouldn't sell my franchise now for a million dollars," Richard Hoppes told Lancaster Farming this week. The franchise he holds is a lifetime contract for all the cow manure in Pennsylvania sold under the Nature's Own label. The Hoppes brothers bought the franchise in 1973 from R. J. Briggs, Woodbury, Tennessee.

The secret to selling liquid cow manure, according to Hoppes, is in the deodorizing agent. "The deodorizer that we buy from Briggs, actually RJB Sales, takes care of the smell," Hoppes said. "It also keeps methane gas from building up in the bottles. If we couldn't control that gas buildup, we wouldn't be able to sell liquid manure. Our contract with RJB gives us a guaranteed price for the deodorizer for the next 15 years, and it guarantees that nobody else in Pennsylvania will be allowed to produce or sell cow manure under the Nature's Own label."

There are now franchised dealers in 40 states, and all indications are that this is a fertile market. The market potential is such, in fact, that Hoppes expects to be buying manure from neighboring farmers in the near future. And although he's been a diaryman for 12 years, ever since he was 19, he said he foresees the time when he

Alan and Nancy Mays

Local 4-Hers Win Entomology Honors

by: Melissa Piper

Entomology is one of the most interesting, yet time consuming projects offered in the 4-H program. The project involves hunting for and capturing insects, pinning and mounting them and displaying the best of a collection.

Two Lancaster County youths who are brother and sister, have spent many hours collecting insects for their entomology projects and have been rewarded for their work by winning several awards at local and State level.

Alan and Nancy Mays have both exhibited their collection of insects in county competition as well as at the State Farm Show.

Alan is a sophomore at

[Continued on Page 23]

Alan Mays prepares an insect for mounting as his sister, Nancy, observes. The 4-Hers reside at 1212 Nissley Rd., Lancaster, with their parents, Mr. and Mrs. Earl Mays.

Monfort on Beef - What Lies Ahead?

(The following address was delivered by Kenneth Monfort to the 56th annual meeting of the American Farm Bureau Federation, held recently in New Orleans. Monfort is president of Monfort of Colorado, Greeley, Colorado, and one of the largest beef feeders in the country.)

My suggested topic, "Where is the beef cattle industry headed in production and marketing?" assumes an expertise that I do not feel. Most of the knowledge I presumed to possess has proven awfully impotent during the last 15 months as we suffered continuous and continuing losses feeding cattle. So, rather than posing as some sort of an expert on the cattle business, let me pose some of the questions and problems I see in our industry and then, as best I can, provide my own non-expert answers to the questions.

Question No. 1. Experts on food and nutrition tell us that beef cattle are the most inefficient converters of grain to protein there is; so why should cattle be fed?

Non-expert answer No. 1. The experts are at least partially right. The cattle feeding industry has been notoriously wasteful of grain. After all, our conversions of 9 pounds of grain to 1 pound of cattle, 20 pounds of grain to 1 pound of edible meat are very wasteful.

But, let us look at why the cattle feeding business even started. We don't have to go back too many years to when there was no cattle feeding

PFU Annual Meeting

Voting delegates for the Pennsylvania Farmers Union held their annual conference on Monday and Tuesday of this week in Harrisburg. They met primarily to formulate policy for the coming year, but also heard from Tony Dechant, president of the National Farmers Union, Pennsylvania Secretary of Agriculture James McHale, and William Mattson, general manager of the Pennsylvania Rural Electric Association.

On Monday, the delegates discussed policies, and on Tuesday submitted each to a final vote. Among the policy statements adopted were:

- Reinstate REAP for 1975, giving county ASC committees the authority to implement practices at the county level. In favor of government payments for liming according to soil tests, and favored lime and fertilizer for three years on new seedings.

- Favored grain reserves on farms, to be released at 115-percent of parity, with a resealing program. Favored government payments for on-farm storage of surplus grains, and facility loans for farm people.

- Opposed an increase in the price of food stamps. Favored an expansion of the food stamp program.

- Favor restrictions on food imports to insure that they meet U.S. health restrictioins. Favor the imposition of variable duties when dairy imports are less than 110-percent of parity. Also voted for a restriction that would require imported food products to bear a label stating their country of origin.

- Favored three federal milk marketing orders instead of the present 61. Also

New Holland

January 13, 1975

Price Per Ton:

35 loads hay & 15 loads straw.

Alfalfa 51.00-79.00, few loads 81.00-90.00; Timothy 48.00-59.00; Mixed hay 47.00-67.00; Straw 37.00-44.00; Orchard Grass hay, one load at 58.00 and Corn, 3 loads 61.00-76.00.

Paul Z. Martin

Wednesday, Jan. 15

38 loads of hay & straw sold as follows·

Alfalfa 49 to 85; Timothy 52 to 63; Mixed Hay 48 to 63; Straw 41 to 46

Regional

(All hay No 2 and better, prices paid by dealers at the farm, price per ton)

Hay & straw fully steady

Alfalfa 60 00-70 00; Mixed hay 40 00-50 00, Timothy hay 35 00-45 00, Straw 30 00-38 00 and Mulch 20 00-35 00

Local Grain

Thursday, January 16

These prices are made up of the average prices quoted by a number of participating local feed and grain concerns. It should be noted, however, that not every dealer or broker handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, January 16, 1975, are as follows:

	Bid+	Offered+
Ear Corn		
New	69.00	75.00
Old	—	—
Shelled Corn	3.30	3.47
Oats		
Local	1.63	1.90
Western	—	2.19
Barley	2.50	2.73
Wheat		
Feed	3.10	3.25
Millers	3.60	—

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

THE OLD FARMER'S ALMANAC

JAN. 20-26, 1975

Get out your shovel or stay in your hovel.

It's not too early to get your income tax information together . . . Winston Churchill died Jan. 24, 1965 . . . First quarter of the moon Jan. 20 . . . Boil snails in barley to cure that January cough . . . Average length of days for the week, 9 hours, 37 minutes . . . Gold discovered at Sutter's Mill, California Jan. 24, 1848 . . . G.I. Joe started going overseas in large numbers Jan. 26, 1942 . . . Raccoons are mating now . . . This cold uncomfortable weather makes Jack and Jill lie close together.

Old Farmer's Riddle: What does a person have, but can't hold for ten minutes? (Answer below.)

Ask the Old Farmer: Is dew a weather indicator? H.F., San Diego, Calif.

For the very short term. Dew on grass at night or in early morning is a sign of fair weather. It forms only when air is dry, skies are clear.

Home Hints To prevent fish from sticking to the pan when frying sprinkle a little salt in the skillet before placing the fish in it *Riddle answer* His breath

OLD FARMER'S WEATHER FORECASTS

New England: Snow to start, then partial clearing and very cold; light snow and warmer latter part.

Greater New York-New Jersey: Snow at first, then clear and very cold; light snow latter part, then clear by weekend.

Middle Atlantic Coastal: Snow all week except snow changing to heavy rain in south latter part.

Southeast Coastal-Piedmont: Rain to start, then clear and cold; heavy rain inland latter part, then partly clear weekend.

Florida: Week begins with cold spell and frost in north, then cloudier and milder; end of week showery.

Upstate & Western N.Y.-Toronto & Montreal: Light snow at first, then clearing and very cold; sub-zero cold snap and clear latter part.

Greater Ohio Valley: Week begins cloudy, then rain in south and snow in north and east; clearer and milder by week's end.

Deep South: Cold snap and clear to start, then rain central and north; rain ending latter part and warmer.

Chicago & Southern Great Lakes: Very cold to midweek, then warmer with scattered flurries; cold snap latter part and partly cloudy with flurries.

Northern Great Plains-Great Lakes: Very cold and partly cloudy to start, then some snow; occasional snow and extremely cold at week's end.

Central Great Plains: Week begins very cold with light snow in north and west, then milder with rain in east; end of week sunny but very cold.

Texas-Oklahoma: Showers and quite cold for first part of week; continuing showers but warming latter part.

Rocky Mountain Region: Light to medium snow for most of week, clear and mild in south and central by week's end.

Southwest Desert: Some light rain and cool at first, then partly sunny and warming to end of week.

Pacific Northwest: Cloudy and cold to start, then snow in north and rain in south, snow latter part, 10-12" in north and 4-6' in south.

California: Rain at first, heavy in south, then clearing and mild; rain continuing to end of week.

This 7-day-old pig's stomach is exactly this size

The little dry feed it takes to fill this tiny "fuel tank" must be

LOADED with POWER

It takes mighty little pig starter and sow's milk to fill the "fuel tank" of a week old pig Yet, it must provide quick energy, fast growth and protection against disease. It must contain all vital nutrients sow's milk may lack—and in just the right balance Most important of all, pigs must like it No matter how great a pig starter may be, all is lost if pigs won't eat it.

Pigs love Purina starters—Baby Pig Chow, Early Weaning Chow Pig Startena And Purina starters offer "built in" livability, plus grow and go power to bounce pigs off to a fast, thrifty start Keeps 'em going, too Fed Purina all the way, hogs have raced to market weight in five months (often less) and make pork for remarkably low cost.

Folks around here are finding out . . . Pigs start, grow, finish fast on Purina Call us soon and order Purina Hog Chow

Park Myers, a partner in the Black and White Sales Barn, Lancaster, is shown here with two of the Farm Show baby beef steers bought by local firms. Black and White bought the Angus, owned by Ken Brubaker, while Lancaster Farming bought the Hereford, owned by Ken's sister, Sarah.

Local Firms Buy Show Steers

Lancaster Farming and the Black and White Holstein Farm, Lancaster, were among the area concerns who helped to support local youths in their baby beef efforts at the Pennsylvania Farm Show this year.

The newspaper bought the steer shown by Sarah Brubaker, 2418 Harrisburg Pike, Lancaster. The 1185-pound Hereford placed third in its class at the Farm Show, and brought 47-cents a pound in the auction ring last Friday.

Sarah's brother, Ken, sold his steer to the sales barn for 50-cents a pound. His 1170 pound Angus placed fifth in its class during Farm Show competition.

Commenting on the purchases, Park Myers, a partner at Black and White, said, "I think it's a good thing for local businesses to support the work these kids are doing. Next year I'd like to see even more steers coming back to Lancaster County."

Among the largest purchasers of Farm Show steers was Lancaster Packing Co., Lancaster. The firm reportedly bought close to 30 steers for its own and other accounts. Lancaster Packing was the agent for the buyer of the grand champion animal.

Poultrymen Banquet Set

The Pennsylvania Poultry Federation announced plans recently for a totally new and different Annual Fund Raising Banquet. Changes include a new date, a new site, and a new format, all of which should give poultrymen in Pennsylvania and surrounding states an exceptional evening; and one that may well become a traditional social gathering for the industry. Plans include a seven piece orchestra for dining and dancing, awarding of valuable door prizes, a live stage show, and the appearance of well known figures within the industry. Details of these plans regarding the change in format will be made known over the next several months.

This year's Annual Fund Raising Banquet, the principal means by which industrymen and allied industries support the Federation, will be held on March 19, 1975, at the Host Inn, Harrisburg, Pennsylvania. Supporters of the Banquet will be recognized by both a program distributed the night of the Banquet and a special edition of the Federation's Newsletter, its regular publication to members. All in all, it adds up to a big night on the town for Pennsylvania poultrymen.

The "Systems Approach" of Big Dutchman let's you...

Put it all together

Today's profit-minded poultry and livestock producers must think in terms of an automatic system.

Big Dutchman pioneered the system concept for one reason: it is the most profitable and reduces costs for you.

"System thinking" can help you plan your way around problems before you begin building, or it can help you automate away problems in your present buildings.

Big Dutchman distributors are geared to provide all components of the system, which assures that the pieces fit together in the most profitable package, reducing costs dramatically.

HOG SYSTEMS

Pa. Ag. Dept. Develops Rural Housing Program

Unemployment and the decline in housing construction will be the targets of a Rural Housing Rehabilitation program to be launched by the Pennsylvania Department of Agriculture, it was announced last week by Secretary Jim McHale.

The department, with an award of $375,000 in federal funds, will begin to recruit workers to renovate and rebuild rural houses in certain target areas in Mifflin, Juniata and Snyder Counties Feb. 15.

McHale said he has contacted county commissioners and other local officials in the three counties to attend a meeting on the pilot project Jan. 14 at 3:30 p.m. at the Green Gables Hotel, Lewistown.

"For many years the lack of job opportunities and the consequent outmigration from Pennsylvania's farming communities have left rural housing in a state of decay. The current recession is nothing new to many rural communities," said McHale. "There's a larger percentage of substandard houses in rural areas than in the cities and, at least, we have now received some seed money to start turning the situation around."

The project, McHale explained, will begin with surveys, interviews and cost estimates in various rural target areas in the three counties. The project is designed to employ the elderly, the handicapped who can perform some task, and youth from low-income families.

"We want to employ older people who have skills in carpentry, masonry and so forth and have them work with and train younger people," said McHale. "Hopefully, these young people will develop skills to enter the private construction job market."

McHale said farm houses and homes in isolated rural communities will receive top priority in the reconstruction program. A second priority will be delapidated homes in communities of 5,000 to 10,000 people.

McHale noted that as the pilot project moves ahead, an effort would be made to secure additional funding from HUD, the Farmers Home Administration and other agencies.

The one-year $375,000 grant for the pilot project derives from an allocation by the U.S. Department of Labor Manpower Administration under the Comprehensive Employment and Training Act of 1973.

Desides funding, the secretary said the department would seek donations of building materials from local communities and private businesses who might be able to claim the donations as tax writeoffs.

The meeting at Lewistown is to inform local officials of the scope of the program and to enlist their aid in pinpointing rural homes in greatest need of rehabilitation.

John Phillips

Phillips Joins Bank

John Phillips has joined The First National Bank of Strasburg as a Trust Officer His responsibilities will include personal trust accounts and corporate accounts.

Prior to joining the Strasburg Bank, Phillips was employed by New Holland Farmers National Bank as head of their Trust Department. A graduate of Lebanon Valley College, he has over ten years experience in the Trust area.

Phillips is a member of the American Institute of Banking and the Lancaster County Estate Planning Council. Active in civic affairs he is the 1974-75 President of the New Holland Lions Club and served as a commissioner of the Boy Scouts of America.

Phillips and his wife Mary reside in Leola.

Preservative Treated Hay As Good As Heat Dried

Alfalfa and orchardgrass hay and timothy low-moisture silage were treated with organic preservatives in a 1973 Penn State study. Hay made at 27 percent - 36 percent moisture was treated and barn stored for approximately 7 months. Temperatures monitored during the first 54 days of the storage did not show excessive heating of treated hays. Following storage, hay was sampled, and animal acceptability was measured using 56 mature, pregnant ewes as test animals.

Similarly, animal acceptability of treated, low-moisture timothy silage, stored in small metal experimental silos, was measured using 42 mature ewes. Results indicate that applications of organic preservatives (1 percent to 1.5 percent of wet forage weight) to hay compares favorably with heat drying, both chemically and in terms of animal performance.

Results from the low-moisture silage test indicate that an organic preservative may have some feeding advantage over non-treated silage in that animals fed treated silage ate more, refused less, and gained more weight than ewes fed non-treated silage.

Grange News

Nearly thirty Grangers went Christmas caroling with the Fulton Grange 66 on December 23rd. In a brief business meeting, Master Donald Trimble appointed a committee to send a telegram to President Ford asking him to sign a bill raising the support price of milk.

A meeting was held on January 13th with State Tropper Edward Rowland speaking on safety. The Junior Grange met on January 11th.

Farm Commentary

Corn Price Slipping Back

The price of corn, both nationally and locally is coming down. This week's price in Lancaster Farming's local grain report stood at $3.30 on Thursday afternoon, but many of the dealers we talked to said they expected that price to drop another nickel by Friday.

Part of the reason for the dip, of course, is the livestock men are cutting back their herds, thereby weakening demand. Another factor, we were told by a seasoned grain buyer, is that the winter had been pretty mild in the Midwest. This meant a lot of cattle were out in the cornfields, grazing on stover.

The weather picture has changed drastically in the last week, however, which will increase some farmers' needs for corn. Of course, many of the cattle caught in the snow and freezing cold perished

McHale's Computer Does It Again

If past history is any indication, Pennsylvania Secretary of Agriculture Jim McHale is in for another round of hoo-ha's from the farm press and farm organizations. At the annual Pennsylvania Farmers Union meeting in Harrisburg this week, McHale said they planned to butcher a yield grade 3 steer and sell the top cuts at retail. The rest of the carcass will be ground into hamburger McHale hopes to make the point that with the profit from the top cuts, retailers could afford to pay consumers 10-cents a pounds to take the hamburger

•

You'll remember a few weeks ago the secretary made headlines by "proving" that it was possible to produce hamburger for 28-cents a pound. His calculations, though, were said to ignore such things as trucking, packaging and normal retail markups

The Arabian Manure Deal

Who'd have ever thought that loaded barges would be leaving the U S, bound for Arabian ports, loaded with liquid cow manure. Several thoughts, all beginning "Poetic justice..." spring to mind but they're probably better left unsaid

Apparently, the Arabs are mounting a tremendous effort to attain a measure of self-sufficiency in food, just as we and other nations are striving for self-sufficiency in energy production It will be something of a modern-day miracle if they really can make the desert bloom.

December Milk Production Off From '74

U S milk production, at 90 billion lbs during December, down 3-10 of 1 pct from a year earlier, USDA reported last week. Though this marked the first month since June that production had been below that of a corresponding month a year earlier, output for all of 1974 still totaled only 114 9 billion lbs., down 7-10 of 1 pct. from a year earlier

Turkey Growers Plan Cutback

U S turkey ouput may be down this year At least, turkey growers in the 20 major producing States say they intend to raise 6 pct fewer birds this year then they did either in 1974 or 1973

Turkey output in those States - which account for more than 95 pct of the Nation's production - is seen at 118 7 million birds That's down from the 126-million totals produced in those States during each of the last two years.

A decrease of 6 pct from both 1974 and 1973 is seen in heavy breed output, while production of light breeds is seen down 2 pct from 1974, 10 pct. from 1973 Growers in those States produced 111.4 million heavy breed birds in 1973, 112 2 million of them last year. Light breed output totaled 15 3 million in 1973, 14 1 million last year Intentions are to produce 105 million heavy breed, 13 8 million light breed birds in the 20 States this year

Despite the over-all cutback, growers in Minnesota, the Nation's leader, say they intend to boost production 11 pct - from 21 9 million to 24 3 million this year Those in North Carolina say they plan to up output 1 pct - to 15 1 million birds in 1975. But, California growers say they'll cut production 12 pct - from 17 9 million last year to 15 7 million

Turkey production totaled 132.2 million nationally in 1973, but declined 1 pct - to 131 4 million last year

World Tobacco Hits Record High

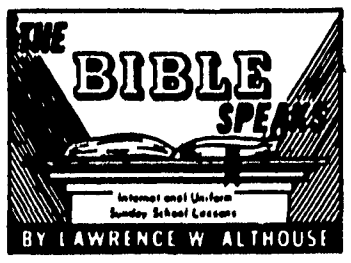
World tobacco acreage and production hit record highs last year At 10 6 million acres, tobacco acreage was up 5 pct from 1973 and 8 pct above its 1968-72 average Production, at 11 4 billion lbs , was up 7 pct from 1973 s previous high, and 14 pct above 1968-72

U S held its position as the world's Number Two tobacco grower, though it still ranks third in tobacco area The People's Republic of China produced 22 billion lbs , the U S 19 6 billion lbs India, 973 million lbs to lead the world producers China, with 19 million acres, India, with 11 million acres, the U S , with 957,000 acres, and Turkey, with 890,000 acres, were the leaders in the area devoted to tobacco plantings

Wheat Prospects - A Familiar Story

Encouraged by higher prices, farmers expanded their wheat acreage 20 pct - only to have their hopes for an abundant harvest dashed by severe drought

Sound familiar? It certainly does, but it's the story of Argentina's 1974-75 wheat crop, the latest to be hit by weather And, output is now put at 5 0 million metric tons, including Durum, and perhaps even less



LORD OF LIFE

Lesson for January 19, 1975

Background Scripture: John 6:35-51; 11: 1-53.
Devotional Reading: John 6: 35-51.

When Socrates was told that the time had come for him to prepare for death, he replied: "Don't you know that I have been preparing for it all my life?"

Quite unlike Socrates, many of us delay in preparing for this great life-event. Sometimes we procrastinate too long and then there is no opportunity to prepare for it. Frequently it is only when we are confronted by death that we begin to ask ourselves what we believe about this experience and its consequences.

He who believes in me

The story of Lazarus in John 6 is founded upon the conviction that Jesus Christ is Lord of both life and death and if we accept his Lordship we do not need to fear death.

In the story we find some of the common attitudes that still abound today.

First there is some petulance on the part of the two sisters. Martha, upon greeting him, seems just a big accusing: "Lord, if you had been here, my brother would not have died" (11:21). In a similar fashion we sometimes complain meekly to God suggesting that if he loved us he would not have let a loved one die!

Next, we find Martha resorting to theological arguments. Told by Jesus that her brother would "rise again," Martha gives lip-service to her beliefs: "I know that he will rise again in the resurrection at the last day" (11:24).

But Jesus is not talking about theological beliefs: he is speaking of her trust in him: "I am the resurrection and the life; he who believes in me, though he die, yet shall he live" (11:25). "Do you believe this?" Jesus wants to know and Martha begins to understand at last: "Yes, Lord; I believe that you are the Christ, the Son of God, he who is coming into the world" (11:27).

She really does not know what Jesus is going to do next. At the same time she knew that she trusted this man implicitly. Therefore, she would put herself and her brother Lazarus in his hands. Somehow, whatever happened, she knew that it would be all right because of Jesus.

Take Away The Stone!

Yet, it is not so easy just to put everything in his hands. We are too conditioned to doing things ourselves to trust another so fully. Thus, when Jesus approaches the tomb and commands the stone to be rolled away, Martha protests that there will be too great an odor from the decomposing body. Once again Jesus must remind her: "Did I not tell you that if you would believe you would see the glory of God?" If she will just trust him, she and her sister will be truly blessed.

So Jesus commands, "Lazarus, come out," and the dead man is restored to life.

We miss the point of this story, however, if we think of it only as a miraculous feat by Jesus. The point is not that Jesus will keep us from dying - for even Lazarus died eventually - but that Christ is the Lord of both life and death!

The call to us is the same as that which was given to Martha and Mary: if we will trust him, if we will put ourselves in his hands, we will find that neither life nor death can intimidate us. Like Socrates we can prepare for the experience of death throughout our life because we are secure in the knowledge that Christ is Lord of both life and death.

To Get Farmer's Tax Guide

The supply of Farmer's Tax Guides is in our Extension Office and farmers are urged to obtain a copy of this booklet in helping to file their 1974 tax returns. This help is also available from the Internal Revenue Office. Since there have been some changes concerning agriculture in tax reporting, all farmers and others who are working tax returns should study the Tax Guide before filing. These are free of charge to anyone interested.

To Be Interested In Pure Water

Modern civilization makes heavy demands on water supplies when we realize that we use about 75 gallons of water per day per person. Obtaining water is simple to most of us merely by turning a faucet or spigot. However, we all must realise that the supply must be there to start with. Water supplies must be preserved and expanded to meet the growing needs. Pennsylvania is in a favorable water situation compared to some states in the southwest such as Arizona; our observations there last October reflected their surface water supplies almost entirely exhausted. Each person should do everything to keep from polluting water and in conserving its use.

To Raise First-Calf Heifers

A recent release from the Dairy Extension office in Virginia calls attention to the mistake of not keeping calves from a first-calf heifer. We are aware of this common practice in this part of the country. The Virginia study shows that many high producing cows and outstanding show animals have been from first calf heifers. One cow that sold for nearly twenty thousand dollars was from two generations of first calf heifers. In addition, the practice of breeding first calf heifers to a beef bull is to be discouraged. Many calves from first-calf are just as good potential herd replacements or show animals as a calf from older cows.

To Stress Quality Forage Crops

One way out of the high grain cost of producing milk or meat is to place more emphasis on nutrients from forage crops rather than from grains. This suggestion has been highly promoted for the past several months and continues to have considerable merit. Dr. Sam Guss at Penn State reports that many dairy cows will be in better physical condition at calving time if a larger part of their nutrients come from roughages rather than from grain. In the past many problems at freshening time have been caused by high grain consumption and little amounts of rughages. As livestock and dairymen plan their crop acres for this year, we continue to suggest that more importance on quality hay and silage could return greater profits.

Letters to the Editor

Editor:

In today's issue of your paper, on the front page, in the article entitled "Lancaster Co. Youth Wins Steer Reserve" you report that - "The winning animal was a coal black Chianina-Angus crossbred." Your information is not correct in that the Champion was a Limousin-Angus steer.

It might be interesting for you to recall that the Champion (and Reserve) steer at the Keystone Int'l last Nov. was Limousin sired steer as well as the Champion Steer in the Carcass contest (which actually has more meaning from a meat production standpoint).

John D. Moore
Chairman, Board of Directors
Eastern Limousin Breeders Assoc.
Carlisle, Pa.

Sonic Boom

A sonic boom is that thunder-like noise you hear when an aircraft passes overhead traveling at or above the speed of sound Such sounds are caused by shock waves from airborne objects resulting in sharp pressure disturbances

Woodbine Farm Receives Awards

Woodbine Farm, owned by George Knight, Jr. and family, RD2 Airville received both the Premier Breeder and Premier Exhibitor award from the Holstein Dairy Show at the Farm Show. They qualified for the award by their Holsteins exhibited placing higher on a point basis than any other Holsteins exhibitors. The awards are received by George's son, Paul from David Norman, York County Assistant Agricultural Agent.

PSU Study Compares Dairy, Beef Growth

Apparent differences in growth and carcass characters exist between beef and dairy breeds. Specific differences and similarities will be the topic of a research summary prepared by researchers at The Pennsylvania State University and presented at the 1975 Livestock Day to be held on March 4.

According to Jose Luis Garcia de Siles, a graduate student working with Drs. John H. Ziegler and Lowell L. Wilson, Holstein cattle gained weight more rapidly and efficiently thereby reaching slaughter weight at younger ages. With respect to carcass characters, Holstein carcasses had heavier trimmed and untrimmed rounds but also more weight and percent of chuck. Hereford carcasses, on the other hand, had greater rib weight, heavier untrimmed loins, higher dressing percents, and more desirable flavor.

There were few important differences in the distribution of muscle within the carcass. Beef cattle have been selected for greater muscle distribution in the high-priced hind-quarter cuts. However, dairy steers have as much, and in some cases more, of their total lean contained in the hind quarter compared to conventional beef breeds.

From these results it appears that crossbreeding beef and dairy cattle may aid in improving growth and efficiency. But using dairy crosses will not contribute, and perhaps even hinder improvement in certain carcass characters and palatability traits.

More detailed results of this research will be available at the forthcoming Penn State Livestock Day to be held on March 4.

Receives Award

Cindy Reggi, the first female rider to claim a riding title at Charles Town, will be presented a trophy by Sports Illustrated on Saturday, January 25 during the racing program at the Charles Town Turf Club.

Reggi edged Clifton Detiege 43-41 to capture the honors during the 1974 Fall Meeting at Charles Town and was honored by Sports Illustrated in the December 23 issue in the Faces in The Crowd section of the magazine.

Marty Zad, Washington representative of Sports Illustrated will present the award to the 18-year-old rider from Harpers Ferry.

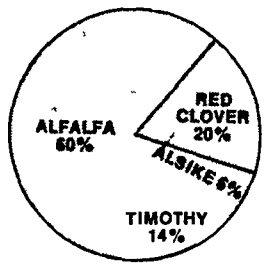
Dependable hay formula for less than perfect conditions

HOFFMAN ALL 'ROUND FORMULA

balanced blending of selected varieties for better yields



Because of its ability to fit a wide range of soil conditions, Hoffman All 'Round Formula has risen rapidly in popularity. It's especially useful where drainage in the same field may range all the way from good to poor.

Where chances of alfalfa success are pretty much of a borderline proposition, or where you expect variable performances in different sections of the same field — All 'Round Formula can be the answer. The combination of varieties used offers more disease resistance, hardiness and persistent yieldability. No common alfalfas are included, and there are several types of timothy. Excellent for hay, grass silage or pasture.

Hoffman All 'Round Formula is only one of 14 outstanding blends — each designed to produce bigger crops of better forage. Each is formulated to enable you to meet your type of soil and your management. See your Hoffman Seed Man.

AFBF Adopts Policies During Annual Meeting

Voting delegates to the 56th Annual Meeting of the American Farm Bureau Federation in New Orleans last week proposed the establishment of an international monetary food fund to meet emergency food needs throughout the world.

The delegates specified that such a fund should be supported by all the nations of the world and that it be used only for the purchase of food in amounts and where needed.

To meet disaster needs, funds could be withdrawn from the fund to purchase needed food from any nation where it is available.

At the same time, the delegates voiced vigorous opposition to domestic and international grain reserves, as well as U.S. participation in any internationally controlled food reserve. The best food reserve for America and the world according to the policy statement, is in the productive capacity of the nation's land, the ability of the American farmer, and the profit incentive system.

To prevent the accumulation of commodity stocks in government hands, the delegates recommended that the Commodity Credit Corporation offer only recourse loans with the interest rate based on the cost of money to the government.

Non-recourse loans permit farmers to deliver farm commodities, placed in government storage as collateral on a government loan, in payment of the loan. This is usually done when the market price is below the price support loan rate.

Suggestions that Americans eat less meat were rejected in a policy resolution because such a diet shift would not increase world food supplies. Only one-third of the total poundage of meat produced in the United States comes from grain. The remaining two-thirds comes from forage crops produced on millions of acres of untillable land that otherwise would be lost to food production. Ruminant animals convert the forage to protein-rich meat.

Farm Bureau policy on controlling inflation clearly indicated that farmers and ranchers believe deficit spending by the federal government, and programs and policies which increase the supply of money and credit faster than production, are basic causes of inflation.

"The economic stability of America requires a reduction in the inflationary level of government spending," according to the policy statement. "Both Congress and the Executive Branch must accept major responsibility in this area," the delegates stated.

Opposition to wage and price controls that "cripple the private enterprise system which has made America strong," was reiterated in another policy statement.

Calling for a free access to world markets as the best means of increasing production to meet domestic and overseas foods needs, delegates said:

"If farmers are to compete on the world market for production equipment and supplies, especially chemicals, fertilizers and machinery, then they must be allowed free access to world markets and world market prices without fear of embargoes or strict licensing of exports so as to cripple the free trade concept.

"Farmers cannot be expected to maintain full production for any commodity without free access to world markets for that commodity

"It is, therefore, imperative that the President and-or appropriate government officials give concrete assurance prior to planting time that embargoes will not be applied during the ensuing year."

Recognizing the continuing need for conserving all forms of energy in the foreseeable future, the delegates urged Congress to review laws dealing with environmental protection and to revise those laws in recognition of the urgent need for such conservation. Farmers and ranchers, the delegates said, shall do their share in reducing energy use where such conservation is consistent with maintaining a source of sufficient food and fiber of high quality.

On government farm programs, the delegates said farm programs should be designed and administered to enhance market opportunities, to the end that in the future farmers will not be dependent on government payments and will earn higher incomes in the marketplace.

"Our objective," the policy statement asserted, "is to create a climate which will enable agriculture to operate under a market price system. Continuing use of direct commodity payments will not permit us to reach this objective.

"The target price concept of the 1973 Farm Act, which includes the compensatory payment approach in disguise, is unsound at any level."

The target price feature in the present farm program establishes a certain price fixed by the federal government that farmers are to receive for certain commodities such as wheat, feed grains and cotton. If the market price does not reach the target set under the 1973 Farm Act, the federal government makes a direct payment to the producer for the difference between the market and the target figure. At the present time, the market prices are substantially above the target levels.

St. Louis Cattle Review

January 16, 1975

Weekly Cattle Review: Receipts 8900, last week 8500 year ago 9400 compared close last week, Slaughter Steers and Heifers 50-1.00 higher, Cows 1.00-2.00 higher after regaining early loss. Bulls fully steady. Supply about 38 percent slaughter steers, mostly Good and Choice 950-1150 lbs. yield grade 2-4, 20 percent Heifers, 15 percent cows and 25 percent Feeders.

SLAUGHTER STEERS: Few loads and packages Choice and Prime 1250-1300 lbs. yield grade 4-5 34.50-36.50, package 1100 lbs. yield grade 3-4 38.50. Choice 950-1150 lbs. yield grade 2-4 37.50-38.25, couple packages 38 50. Mixed Good and Choice 36.00-37.00, Good 31.00-36.00, Standard and Good Holsteins 1100-1400 lbs. 29.00-31.75. Standard 23.00-27.00.

SLAUGHTER HEIFERS. Choice and Prime 900-1000 lbs. yield grade 3-4 36.50-37.00. Choice 800-1000 lbs. yield grade 35.50-36.50. Mixed Good and Choice 34.00-35 50, Good 30.00-34.00, Standard 23.00-28.00.

COWS: Late sales Utility and Commercial 16.00-18.00, few Holsteins 18 50-19.00, Cutter 14.00-16.00, Canner 10.00-14.00.

BULLS. Yield grade 1-2 1100-1600 lbs. 21.00-24.00, few thick muscles yield grade 1 1400-1500 lbs. 24.50-25.50, thin muscles 800-1000 lbs. 18.00-20.00.

VEALERS: Choice 34.00-39.00.

WOOLED SLAUGHTER LAMBS: Choice and Prime 90-110 lbs. 39.00-40.00. Choice 36.00-38.00.

Weekly Sheep Summary: Receipts 300, last week 750, year ago 450 Slaughter Lambs steady to 1.00 lower, supply mostly small lots Wooled Slaughter Lambs, few Slaughter Ewes.

WOOLED SLAUGHTER LAMBS: Choice and Prime 85-110 lbs. 39.00-40.00. Choice 36.00-38.00.

SLAUGHTER EWES: Utility to Choice 4.00-8.00.

Farmer Spokesman Award Announced

Outstanding young farmers from across the United States will be taking their "farm-to-food and fiber" story to big city audiences in early 1976 as a result of a new "Young Farmer Spokesman for Agriculture Award" program announced at the National Young Farmer Educational Institute held recently in Oklahoma City, Oklahoma.

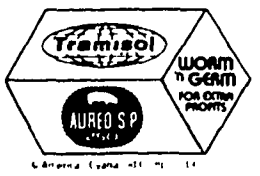
The new "Spokesman's" program, to be sponsored by Elanco Products Company, Indianapolis, Indiana, will provide young farmers an opportunity to tell their story to the masses of consumers who rely on the products of their toil. Plans call for the selection of three "Spokesmen" who will visit with consumer groups and news media in several large urban centers on a week-long blitz in January, 1976, according to Jim Haskins, Elanco agricultural communications associate.

Over 1,000 young farmers and wives from twenty states sought "Better Farming Through Education" at the Young Farmer's eighth annual Educational Ins. . .

Included in the four-day program, sponsored and arranged by the Oklahoma Young Farmer Association, were visits to several farms and ranches of outstanding young farmers, the Cowboy Hall of Fame, and a night at the National Finals Rodeo in Oklahoma City.

At the meeting, delegates announced plans for a 1975 Institute in Atlanta, Georgia, and selected Denver, Colorado, as the site for their annual meeting in 1976.

Stevens Feed Mill, Inc.
offers hog farmers in Lancaster county a new program to help keep your hogs "insides clean"



*Knock out worms with TRAMISOL, the wormer that gets the four major species of worms in the intestines, and lungs

*Maintain healthy hogs with feeds containing AUREO S P 250. Improves weight gains and feed efficiency by helping to prevent scours, rhinitis and cervical abscesses

This year help keep your hogs "inside clean" with TRAMISOL and AUREO S·P 250.

Red Lion FFA Members Receive Keystone Degrees

(Editor's Note): Because of their late arrival, the following biographical sketches of Red Lion High School FFA members could not be included in our Keystone Farming Edition.

Joel T. Harrison

Joel is the son of Mr. and Mrs. Harvey C. Harrison of Wrightsville R1. He has taken projects that included swine fattening, capons, corn and work study in the area of agriculture supplies and products.

Joel has exhibited swine, corn and vegetable at the York fair and has received bronze medals for his project book work. He served as vice president and reporter for the FFA and h:s participated in FFA extra curricular activities.

Harry R. Harrison

Harry is the son of Mr. and Mrs. George Harrison of Wrightsville, R1. He has taken crops, corn, oats and poultry production for FFA projects.

Last year, Harry won a silver medal for his project book and 3rd place in the salesmanship contest two years ago. He has been chaplain for the FFA along with working in the agricultural products area.

Wayne E. Bankert

Wayne is the son of Mr. and Mrs. Preston Bankert of Red Lion, R3. He has taken swine and sheep breeding for projects and has shown his animals at numerous fairs all over the state as well as at the Farm Show.

Wayne has served his chapter as secretary and was on the meats judging team for FFA. He attended the FFA National Convention to compete in the meats judging contest and has won trophies for his farm mechanics and livestock work.

Joseph A. Snyder

Joseph is the son of Mr. and Mrs. Joseph W. Snyder, Airville, R1. He has taken projects of field corn, wheat, mixed hay, rabbits and work experience in a local cannery.

He has been an active FFA member for four years and won a bronze medal for project book work. Joseph has also exhibited animals at the York Fair.

Keith E. Sechrist

Keith is the son of Mr. and Mrs. Kenneth E. Sechrist of Red Lion, R1. As an FFA member, Keith has taken several projects that have included Dairy heifers, swine finishing and work experience in the dairy field.

Keith was the York County Star Farmer in 1974 and has served as president of the York County FFA. He has won medals in the record book competions and has shown his hogs and dairy animals at local and state shows. He served his chapter as president for two years.

Wayne Bankert

Harry R. Harrison

Joel T. Harrison

Dean F. Innerst

Keith Sechrist

Joseph Snyder

Dean F. Innerst

Dean Innerst is the son of Mr. and Mrs. George Innerst of Red Lion R3. He has taken FFA projects that included dairy heifer, veal calf finishing and beef fattening.

Dean has exhibited dairy and beef animals at the York Fair and placed first in the County FFA salesmanship contest. He has held the office of Sentinnel for York County.

Perfect Donuts

To make perfect donuts, place each one on a square of aluminum foil (slightly larger than the donut itself) with a hole punched in the foil for drainage When ready to fry, drop donut and foil in the fat When fried, pick out the foil

Pa. Poultry Production Dips

The year of 1974 ended with a downturn in poultry production for Pennsylvania and the nation.

During the week ending Dec. 28, 1974, placements of broiler chicks in the Commonwealth were 1,223,000. This represents a two percent decrease below the corresponding week a year earlier, and two percent below the previous week.

Average placements during the past ten weeks were three percent below a year earlier.

Broiler placements in the 21 key poultry producing states were 53,831,000. This is one percent below the previous week and one percent below the same week a year earlier.

Average placements in the 21 states during the past ten weeks were eight percent below a year ago.

Liquid Feed Supplements

JOHN Z. MARTIN
New Holland RD1
Phone 717-354-5848

Mol-Mix is a high quality liquid feed supplement with a molasses base, which supplies energy, protein, vitamins and trace minerals at low cost. Scientifically-developed to balance grain and roughage intake while stimulating rumen activity. The **Mol-Mix** formula aids in better feeding efficiency, providing lower cost gains for cattle on range and in the feedlot.

NATIONAL MOLASSES COMPANY QUALITY Since 1918 SERVICE

Area Farm Tax Meet Scheduled

To prepare a better tax return, all farmers and tax practitioners interested in increasing their knowledge in income tax reporting and tax management should attend the 1975 area Farm Income Tax Meeting.

The objectives of the one-day meeting are to discuss (1) changes in the federal tax laws affecting farmers, (2) answer questions concerning tax reports and management practices, and (3) state income tax reporting.

The program will be held on Wednesday, January 22, 1975 at the Lancaster Farm and Home Center, Rt 72 and Rt 30 intersection on Arcadia Rd., beginning at 10 a.m. and lasting until around 3 p.m. Speakers for the program will be Jesse Cooper and B. Wayne Kelly from the Farm Management Extension Department, Pennsylvania State University.

Some of the subjects being covered include filing dates for regular and prorated taxable income; depreciation methods and rates; investment tax credit; tax savings in the retirement program, involuntary conversions, income tax changes, reporting state taxes, how to get back taxes, and capital gains and losses among others.

A registration fee of $5.00 will be collected from each family unit on the day of the meeting to cover the cost of materials. The Farmer's Income Tax Guide, 1975 United States Master Tax Guide, and other materials will be available.

Advance registration would be important to make sure enough materials are available and room and meal accommodations are sufficient.

For more information, or to make reservations, contact the Agricultural Extension Office, in your county.

Holstein Club Meets

Paul King of Atglen was recently elected president of the Chester County Holstein Club. Other officers elected were Les High, Vice-president; Bob Pepple, Secretary; George Lamborn, Junior Activities Chairman. Don Hostetter and Glen Freese are the club's sales representatives. Dave Weaver is the show chairman for the coming year.

On November 14, 1974 the Chester County Holstein Club had their annual banquet at Upper Octorara Church, Parkesburg. Ninety-five members and guests were present.

The Sandy Hill Quartet sang several selections after which the new directors were elected. Glen Freese was elected to represent the club as State Director. Ed Lawrie, Jeff Yoder, and Nelson Stoltzfus were elected as new directors.

Les High presented the youth awards. Jim Stanton was awarded the Distinguished Junior Member Award. Sandy Evan's cow brought her the honors of the Milk & Fat Contest. Three awards were given in 4-H Holstein Achievement. Ernest Stoltzfus received the First Year Division; Nancy Yarnall, the Junior Division and Steven Mason, the Senior Division.

The club is planning to participate in the State Calf Sale in April. They also plan to have a tour in March and a county Black & White Show at Goshen Fair this year.

Warnings on Treated Seed

The Maryland Department of Agriculture is warning growers and buyers of grain and soybean not to mix treated seed with lots of these commodities intended for market.

M. H. "Gus" Day, Chief of the agency's Turf and Seed Section, warns that grain or soybean shipments containing even minute quantities of treated seed will be faced with condemnation under Federal law. "One or more treated seed found in a carload of soybeans or cereals at a terminal market will result in the destruction and loss of the entire load," he said.

Treated seeds, intended for planting purposes, contain a variety of toxic substances including mercury compounds. The risk to human life is so great, Day emphasized, that the U. S. Food and Drug Administration has established a zero tolerance level for grains or soybeans. And anyone caught dumping or shipping loads contaminated with treated seed is subject to legal action.

Detecting the presence of treated seed is relatively simple. Grain dealers are advised to sample carefully each load as it is dumped, and before it is mixed with other lots in the bin, holding tank or rail car. All grains and soybeans, upon arrival at a terminal center are passed under an ultraviolet light to detect for treated seeds. If FDA officials discover the presence of such seeds, the entire load is rejected and must be destroyed. Day said that several local grain dealers recently experienced this problem when one or more farmers put treated seed in a shipment for market. As a result, several trailer truckloads of soybeans had to be destroyed, without compensation.

Feed mills buying grains or soybeans are also required to test for the presence of treated seed before grinding takes place. There have been instances where entire flocks of chickens had to be destroyed when feed being used was tested and found to contain treated seed.

Day further advised that farmers raising soybeans face the problem of pokeberry stain on their crops. Beans discolored by pokeberries, though not harmful, are frequently held up at market until tests determine that the stain does not contain any toxic substance. He advised that pokeberries should be controlled by the use of an appropriate herbicide well before harvest to avoid the stain problem.

Grain elevators and collectors are advised to keep pokeberry-stained beans apart from regular stocks to reduce the possibility of contamination.

Milk Support Price Increased to $7.24

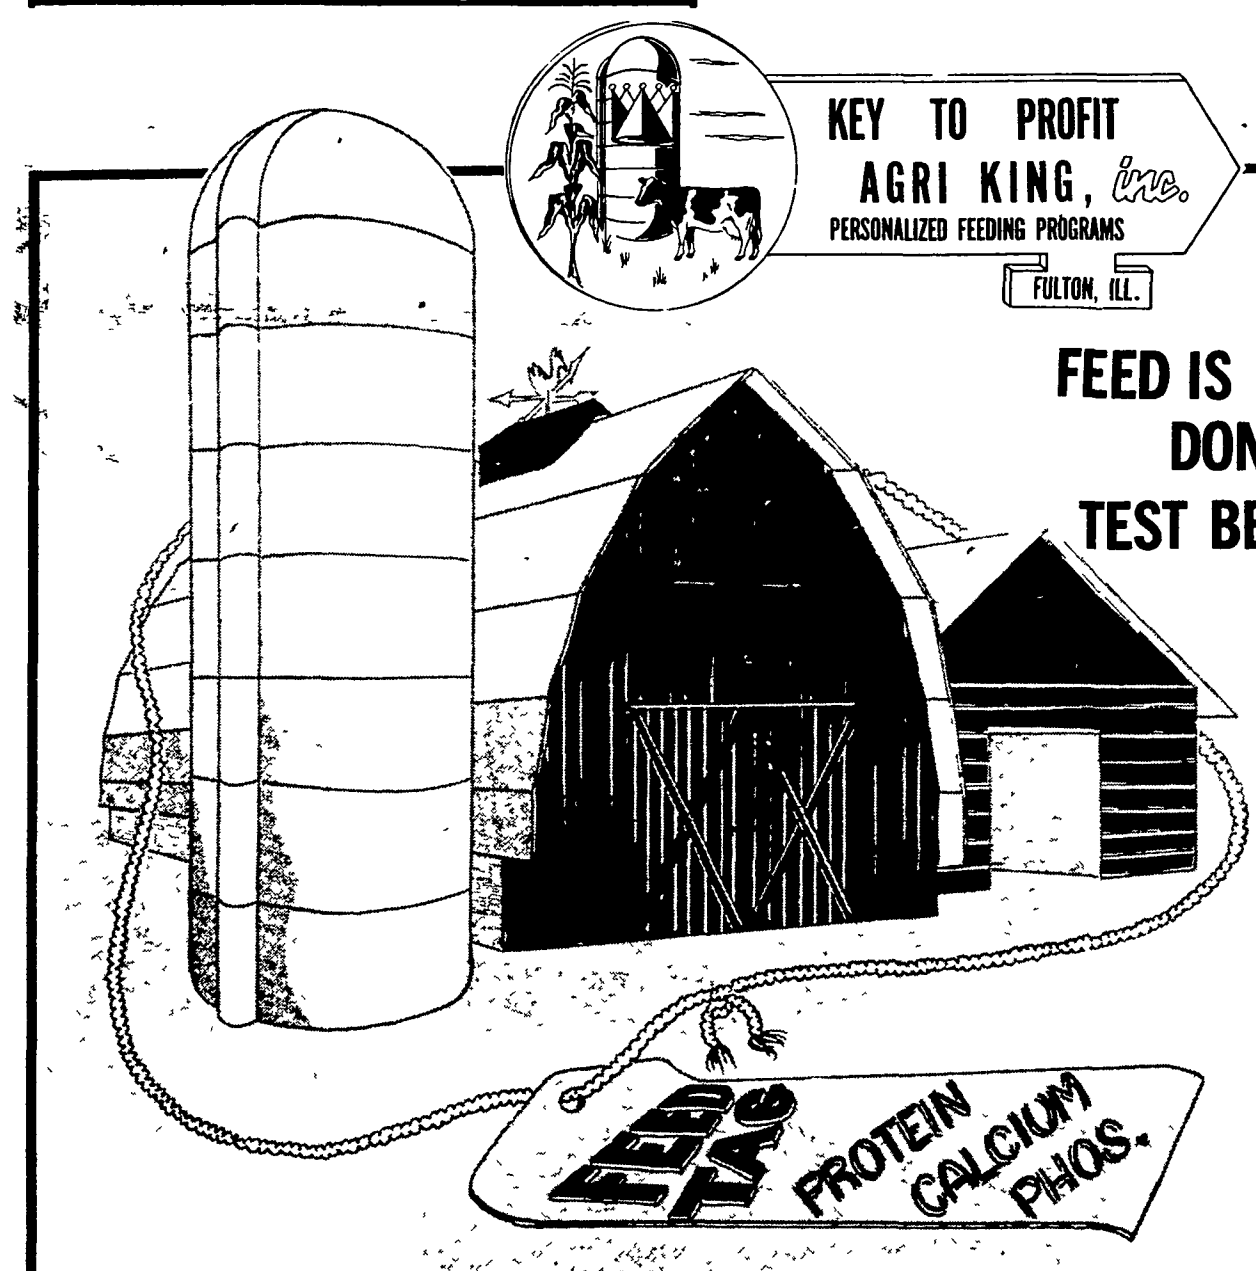
Secretary of Agriculture Earl L. Butz announced last week that the support price for manufacturing milk will be increased from $6.57 to $7.24 per hundredweight. The increase is effective immediately and will remain in effect through this marketing year and the next marketing year which ends March 31, 1976. The new level of support is 80 percent of parity, based on the most current parity data, compiled as of Dec. 15, 1974.

Butz said this action is necessary because farm milk prices have declined while costs have remained at high levels. The prices farmers received for milk were substantially lower in December than in November, the first monthly decline since last summer. Without this action, the Secretary said prices would have dropped even further in the next month or two, the very time when producers must feed greater quantities of grain and high priced commercially preparec concentrate feeds. Under these conditions, many producers would have left dairying and the future production of milk and dairy products would have declined.

The action by Butz came on the heels of a veto by President Ford of a bill which would have given dairy farmers an increase in milk price supports to 85 percent of parity. Present law calls for a minimum support price equal to 75 percent of parity. That law also requires the secretary of agriculture to set a support price by April 1 of each year.

Federal Order 4 producers could expect to receive about $10.13 for Class 1 milk if the Minnesota-Wisconsin price series responds to the mandated support price. The blend price, if Class 1 utilization were 67 percent, would be about $9.18.

KEY TO PROFIT
AGRI KING, inc.
PERSONALIZED FEEDING PROGRAMS
FULTON, ILL.



FEED IS HIGH PRICED . . .
DON'T WASTE IT!
TEST BEFORE YOU INVEST!

There isn't any way you can feed a balanced ration unless you test your home grown grains and roughages for protein, calcium, and phosphorus.

Then feed according to the nutritional values of your crops, in relation to the nutritionally balanced needs of your livestock.

In this way you will be utilizing your crops to their fullest extent, cutting other unnecessary feed costs and increasing your livestock profits. Agri-King feeding programs put it all together for you.

Tree Planting Projects

The Governor's Advisory Committee on Tree Planting is urging all groups, organizations and local government units who are considering programs for the Nation's Bicentennial to give thought to the many tree plantings projects which are possible.

Committee spokesman Samuel S. Cobb, Director of the Bureau of Forestry in the Department of Environmental Resources, said the planting of trees offers lasting benefits to citizens and to communities, benefits which will continue for decades after the actual Bicentennial year.

"Few, indeed, are the communities, be they large cities or rural villages, which do not offer situations where the well-planned planting of trees, individually or on a large scale, cannot enhance the beauty or enrich the life of the residents," Cobb said.

Typical situations that exist in almost any community include:

- Initial planting of shade trees.
- Replacement of lost or dying shade trees.
- Landscaping of parks, green belts and other areas of public land not devoted to some intensive recreational use.
- Establishment of green belts along streams and other narrow land strips unusable for other purposes.
- Screening of unattractive areas on the approaches to communities such as mine spoil banks, waste banks, quarries and other eyesores.
- Establishment of school or town forests for outdoor educational areas in conservation and ecology.

Such projects lend themselves to action by clubs, civic organizations, youth groups, schools and local governments.

To have such projects underway during the 1976 Bicentennial year, planning should be started now, Cobb said.

There are a number of State and Federal agencies which can, and will, provide technical and professional assistance in formulating such plans as well as advising on sources of tree stock.

For further information, write to the Governor's Advisory Committee on Tree Planting, Department of Environmental Resources, Box 1467, Harrisburg, Pa. 17120.

GARTH HURLBUT
EQUIPMENT AUCTION
SATURDAY, JANUARY 25, 1975
12:30 P.M. SHARP
ARKPORT, NY
Sale to be held at the farm located approximately 3 miles North of Arkport on Arkport Dansville Road, Route 36.

Due to other interests will sell all personal farm equipment as follows:

I.H. No. 856 Diesel tractor with new rubber and in excellent condition. IH No. 450 diesel with WFE, just overhauled. IH No. 450 gas with WFE just overhauled. IH (C) tractor A-1 condition. IH No. 203 SP combine with 12 ft. head. IH No. 16 field chopper with corn and pickup heads. IH No. 58 6-row corn planter only 2 years old. IH 14" 4 bottom TRL plow. IH 16' harrow, used on approx. 20 acres. IH No. 990 haybine Ford Farm truck with 12 ft. stake body and hoist. 12 ft. farm TRLR with hoist. Allis Chalmers No. 60 combine with bin and scour cleaner. IH fertilizer auger for gravity flow body. Century 300 gal. weed sprayer with HD pump.

Approx. 12 bu. Timothy seed. Also selling approx. 300 ton of mixed alfalfa haylage and corn ensilage. (will load)

A well cared for line of equipment to be sold. No small tools. Lunch available.

Terms cash or good personal check subject to proper indentification.

We want to say
THANK YOU...

whether you're an MF customer or not.

Thanks for making it through 1974 in spite of the weather, inflation and shortages. In spite of critics who didn't always understand your problems. And in spite of companies who couldn't always make enough products fast enough.

We've been doing everything we can to give you machinery, parts and service when you need them. Together with Massey-Ferguson, we're gearing up to do even better in 1975.

Thankfully, you've learned to adapt by planning ahead and ordering earlier than ever before. We appreciate your cooperation and patience.

Now, it's planning time again. We'd like to help you get ready for the year ahead. Give us a call soon.

NOW IS THE TIME TO REPAIR AND SERVICE YOUR EQUIPMENT FOR SPRING.

Make 1975 your year to Hitch up to Massey.

Scott Wins DHIA Honor

Robert Scott, RD2 Delta (center) received the State DHIA Award for 1974. This is given by the Pennsylvania Dairymen's Association to one supervisor in the state each year. Bob is shown with his wife and Herb Gilmore, Penn State Extension Dairy Specialist, who presented the award on behalf of the Pennsylvania Dairymen's Association. Bob has been a milk tester for the past 42 years in southern York County and has also been active in his community.

Applications For Cabin Rental Due

William C. Forrey, Director of the Bureau of State Parks in the Department of Environmental Resources, said today that applications may now be submitted for rental of cabins in state Parks for the summer season.

The summer season opens the first Saturday after Memorial Day and ends the Tuesday after Labor Day. Only Pennsylvania residents are eligible to rent cabins during this period.

There are 146 cabins available in 11 of the State Parks - Black Moshannon, Centre County; Clear Creek, Jefferson County; Cook Forest, Clarion County; Cowans Gap, Fulton County; Kooser, Somerset County; Linn Run, Westmoreland County; Parker Dam, Clearfield County; Promised Land, Pike County; Ralph Stover, Bucks County; S. B. Elliott, Clearfield County; and Worlds End, Sullivan County.

Information and application forms for cabin rentals is available from the Officer of Public Information, Department of Environmental Resources, Box 1467, Harrisburg, PA 17120.

Because of the demand for cabin reservations, the State Parks Bureau uses a lottery-like system to determine who may rent the cabins.

Applications for cabin rentals for the summer season are to be mailed to the appropriate Park Office and will be numbered consecutively as they are received.

Shortly after April 1, each Park office will receive a list of random numbers determined by a computerized program. Applications are approved according to the numbers on the random list.

Thus, if number 168 was at the head of the computerized list, applications bearing number 168 at each of the Parks with cabins would be awarded the first reservation.

This week Park superintendents are awarding reservations for the Spring rental season which begins April 14 and continues to the first Saturday after Memorial Day.

Applications were received during the past two months and numbered sequentially. A different random list of numbers selected by the computer program is used to award the Spring rentals.

Pennsylvania residents receive preference in renting cabins during this period by means of a separate drawing just for Pennsylvania residents. Any cabin vacancy which exists after residents' applications have been completed is made available for non-residents.

Prize Capons

York County 4-H Capons came home with 5 of the first 6 places at the 59th Annual Farm Show held last week in Harrisburg.

Of the 17 birds entered in the 4-H Dressed Capon Class, Emily Livingston, 5441 Davidsburg Rd., Dover walked away with the Grand Champion bird while her sister, Joyce had the 3rd place capon.

Others placing were Roy Thompson, R1, East Berlin - Reserve Champion; Wanda Kneller, R1, Brodbecks - 4th; Kerry Zinn, 5330 Davidsburg Rd., Dover - 6th; Pearl Kneller, R1, Brodbecks - 9th; and David Sueck, R1, Airville - placed 13th.

Each of the above are members of the York County 4-H Capon Club.

Monfort on Beef

(Continued from Page 1)

industry. Cattle were slaughtered when they came off the rangeland. They came off in batches and the slaughter for a few months was very high. The rancher got paid very little since for a few months was very high. The rancher got paid very little since he was marketing at the same time as all his neighbors Packing plants worked 12 hours a day, seven days a week. Consumers had lots of beef . and then it quit The cattle were all marketed and everyone waited until the next year, the next harvest time.

Lots of farmers, my dad included, saw this as an opportunity. He had hay and barley to sell, others had corn, the Great Western Sugar Company had beet pulp, and so some farmers bought some of those surplus cattle, fed them some feed and marketed them three or four months later. As the practice grew, the rancher didn't have to sell his cattle quite so cheap, the packing plants and their employees could produce and work year around, the consumers had a year around supply of beef and dad and other farmers had a market for their feed stuffs.

Almost by accident we found that the consumers really preferred our fed cattle to what they had been eating and so we created a demand for "choice" beef. But, now we know that we went too far.

With the ever increasing supplies of feed grains at economical prices, with a tremendous infusion of "tax shelter money", with expanding affluence of the consumers and their obvious preference for this fed beef, we kept buying younger and younger feeder cattle, putting more and more of the weight on in the feedlots, becoming more and more dependent on and wasteful of our feed grains . . . and the bubble burst last year.

It was bound to happen. It had to happen because we were using too much feed, because we were getting more costs in our cattle than the consumer could or would pay and because we were building up too big a national cow herd and producing too many calves.

Back to my answer. Cattle are bad converters of grain, but awfully good converters of grass and roughage into protein. To maximize our food resources we will produce large amounts of beef. To use up available feedstuffs and spread marketings and provide quality beef, we will have feedlots . . cattle on feed.

But, we might as well get used to maximizing our production on grass and roughage and finishing the yearlings and 2-yr old cattle in the feedlots. If we combine the weight from grass and roughage with a minimum feeding time, we are converting about 3 pounds of grain . . . grain not normally consumed by humans, into one pound of edible beef. That is good and efficient conversion and it is a practice that will prove energy and nutritionally efficient under careful analysis for years to come.

Question No. 2. Do we have too many cattle in the U.S. and too little grain? What will be done about it?

Non-expert answer No. 2. We have too many cattle, primarily too many beef cows. We are producing more calves than we can market profitably and don't have the roughage to keep those calves on forage longer. Therefore, we must reduce our cow numbers by about 20 percent. We will do that by converting them into hamburger and eating 125 to 128 pounds of beef per capita each year for the next 3 to 4 years.

Too little grain, yes! But, enough feed grain for the type of cattle feeding I have suggested. Price of feed grain plus the lack of liquidity in the cattle feeding, hog raising and poultry business is rationing our grain supply enough to cover the 2 billion bushel "shortfall" in our corn crop last year. This has been an amazing adjustment, an adjustment that I was worried we could make, but one that we have. Daily it becomes more apparent that we are not overusing our feed grains even with the very short crop.

Question No. 3. But, shouldn't the U.S. use all of their grains to help feed the world? Shouldn't we quit over consuming while others are starving?

Non-expert answer No. 3. World population can and is expanding faster than any potential increase in agricultural production. The number one question here is not how we divide up our foodstuffs, or even who pays for what, but . . how do you stop population growth that exceeds our ability to feed that population Other nations must provide those answers. We do little long term good by exporting food that keeps others alive if those who are kept alive simply reproduce and need ever larger amounts of food Thomas Malthus told us this fact in 1798 in what is now called the Malthusian theory.

I happen to believe that our food responsibilities lie in this order:

1. Take care of our own people . . we have many poor and many out of work people here in the U.S.

2. Sell to customers who have and will be dependent upon the U.S for food supplies but who are acting responsibly population-wise and demand-wise

3 Provide humanitarian assistance to those suffering from drouth, poor crops and the like.

Not listed here is the need to deprive our own American people of a better than average food supply to take on worldwide commitments that we can never keep. Perhaps some sociologists and archbishops want to live on the same kinds and amounts of food as do the hungry in Bangladesh . . . but, if they spent 8 or 9 hours on a combine or on the boning table in our packing plant, they would neither want to nor think they should.

Question No. 4. What can the government and the USDA do to help what is a very sick industry, the cattle industry?

Non-expert answer No. 4. First, they can get realistic about some things. They had better realize that weather is apt to be not as good for the next 20 years as it has for the past 20 years and adjust their estimates of production of grains, particularly feed grains. While they are at it, they might just as well realize what all of us knew all along, that the acreage coming back into production from the soil bank was the worst acreage we had and that they better not figure it for 100 bushel per acre corn production.

They have some other goofy figures, too. I see that they are projecting food price increases of 15 percent for the year. They do this by computer, computers that don't realize that the consumers aren't going to pay that much. I would guess that this is triple what food prices will increase . . . we might even have some decrease. There is a demand side to the supply-demand equation.

The USDA can help a great deal by talking facts to the American people. These facts can include the fact that we are entering a period of time when grain supplies will be tight, that we need to conserve them as much as possible and therefore we are going to change the grading standards of beef.

This would make a far better speech for Dr. Butz than the one he gives where he talks grandly of growing 200 bushels tomorrow where

An old bulk milk tank and a franchise fee were the only investment Richard Hoppes made to get into the liquid manure business. Thousands of white gallon jugs like this have gone from the Hoppes farm at Hamburg RD2 to lawn and garden stores around the state.

Money From Manure

(Continued From Page 1)

may have to give up tending cows to concentrate on the manure business.

Hoppes grew up in the Hamburg area. He's a director of the Berks County DHIA, a local Jaycee director, president of District 1 of Inter-State Milk Producers, editor of the Pennsylvania Young Farmers Association magazine and, two years ago, finished second in the Pennsylvania Jaycee competition for the state's outstanding young farmer.

Even if he weren't selling liquid manure, Hoppes' dairy operation would be an unusual setup for this area. He owns just two acres of ground. There he's built a free stall dairy barn with a 60,000 gallon liquid manure pit. Up until last year, he bought all his feed. Now, however, he rents three farms to grow corn and hay.

Herd dispersals have been a regular part of Hoppes' plan. His present Holstein herd is composed of about 80 percent two-year olds, and his latest DHIA figures showed an average production of 13,000 pounds of milk and 460 fat. His feeding program includes grass and corn silage, free choice hay, and grain in the parlor. He is also currently feeding apple pomace, a byproduct he obtains from a nearby apple juice manufacturer.

Manure is scraped daily into the pit. From there it goes into two 300 gallon old bulk milk tanks. The deodorizer is added in the bulk tanks, where it is thoroughly agitated. The product goes directly from the bulk tanks into white plastic bottles holding one gallon each. "Our only investment in this whole operation, really, was for the bulk tanks and the franchise," Hoppes said.

Those white bottles are being sold in lawn and garden stores throughout the state. Department stores and grocery outlets have also been buying manure from the distributors. The bulk of the bottle sales takes place in February, March and April, when home gardeners are out in force. Sales to farmers have so far been virtually nonexistent.

A brochure which explains the use of the liquid manure says that it is not meant primarily as a fertilizer, but rather as a soil conditioner. "The analysis," Hoppes explains, "is only around 2-2-2, which doesn't begin to compare with commercial fertilizer. People buy it mostly to add organic matter to their soil. We've got a good market here in the East, too, because that's where all the people are."

Although other dairymen have been shut out of the R.J. Briggs organization, Hoppes expects that he'll be buying liquid manure from at least some of his neighbors in the near future. "We'd have to get it from farmers with liquid systems, because we can't have any bedding in it," Hoppes explained. "We don't know yet exactly what we'll be paying farmers, but it should be about a nickel a gallon. If we'd get 70,000 gallons from a farmer, that would mean we'd be paying his $3500 a month just for his manure."

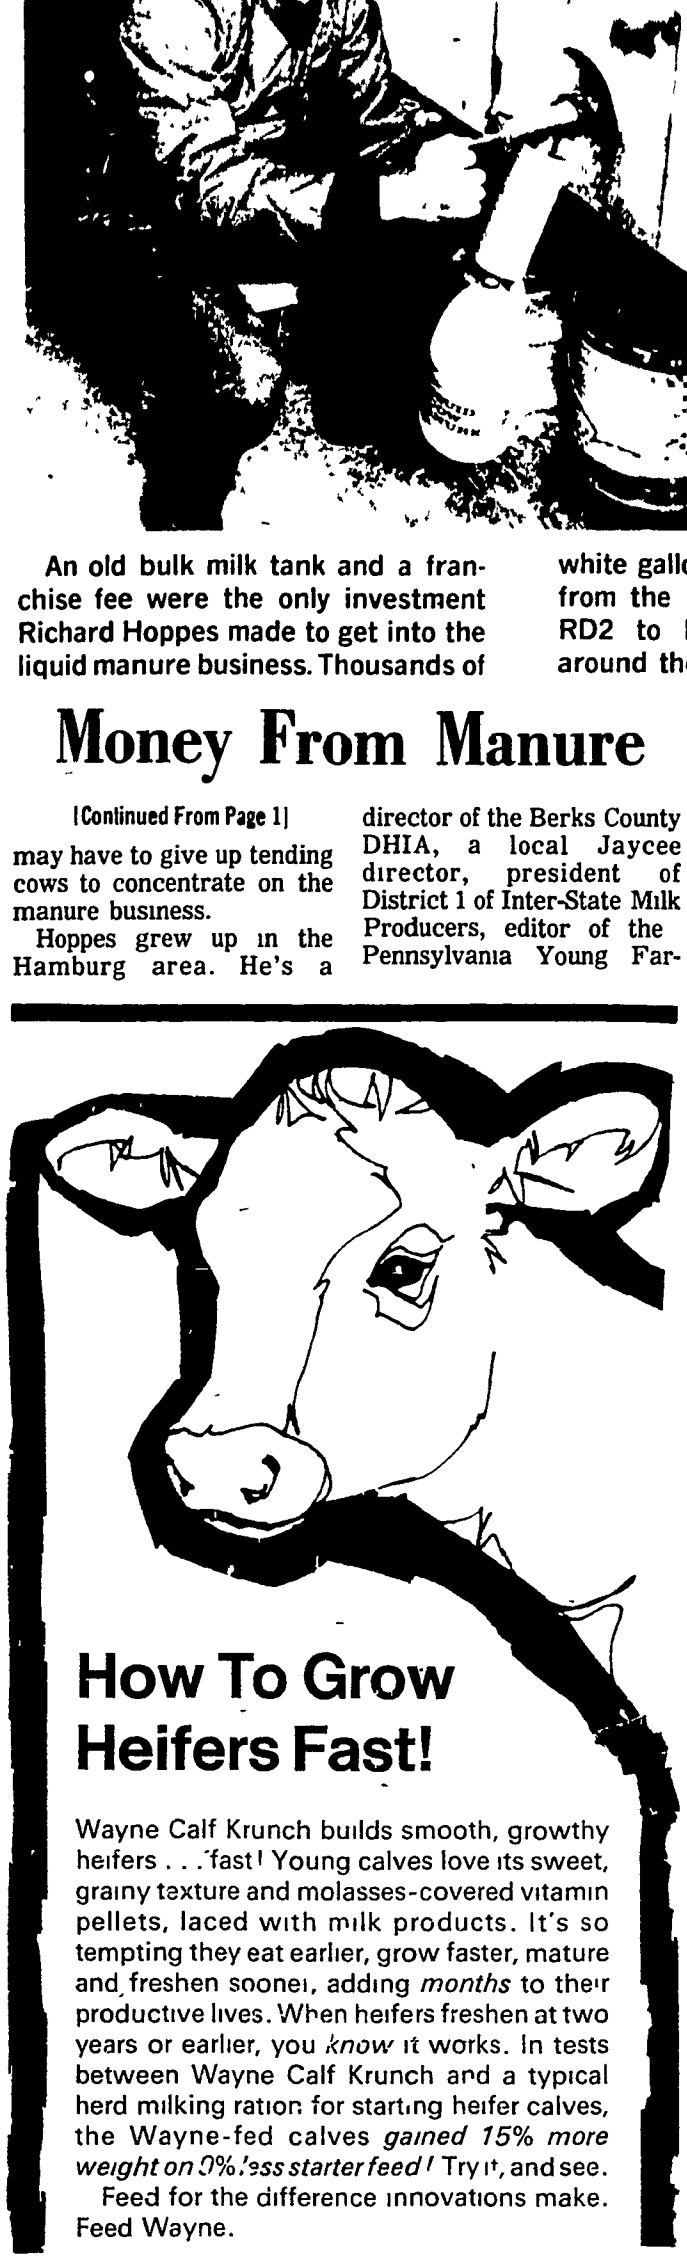
"One nice thing about a set up like that would be that the older cows and heifers would be earning at least part of their way. We're not ready to buy yet, but we hve had some calls from farmers who've said they're interested in selling cow manure to us."

The bottling business, of course, is expanding. But Hoppes expects his need for product to skyrocket in the next few months as he begins delivery on a bulk contract which calls for 500 tons a month. "RJB Sales has a three-year contract to supply liquid manure to the Arabs," Hoppes said. "They've asked all their franchise operations to ship manure to Lake Charles, Louisiana. There it'll be loaded on barges and sent to Dubai or Bahrain, sheikdoms on the Persian Gulf."

The Arabs are using some of their oil money in an attempt to reclaim desert land, to make it fit for crops. A 40-inch pipeline, 200 miles long, has been built from the coastline into the desert interior. The liquid manure will be sprayed on the arid wastelands along with grain seed. For six years, the Arabs plan to plow down the grain crops, adding organic matter to the soil. Only then will they attempt to plant crops.

The R. J. Briggs contract calls for shipments from the U.S. totaling 50,000 tons per month for three years, with potential sales of around $1.2 billion. Wood chips from Virginia are also being bought by the Arabs in an attempt to add organic matter to barren soils.

Three ships will be shuttling back and forth from Lake Charles and the Arabian sheikdoms, hauling their cargo. Tanker trucks will haul the material from Pennsylvania and other points to Lake Charles for loading onto the tankers.



How To Grow Heifers Fast!

Wayne Calf Krunch builds smooth, growthy heifers . . . fast! Young calves love its sweet, grainy texture and molasses-covered vitamin pellets, laced with milk products. It's so tempting they eat earlier, grow faster, mature and freshen sooner, adding *months* to their productive lives. When heifers freshen at two years or earlier, you *know* it works. In tests between Wayne Calf Krunch and a typical herd milking ration for starting heifer calves, the Wayne-fed calves *gained 15% more weight on 0% less starter feed!* Try it, and see.

Feed for the difference innovations make. Feed Wayne.

Penn State Livestock Day Program is Set

Many timely topics of economic importance will be discussed at the annual Beef Cattle Program, to be held on Penn State campus at University Park, Pa., March 4. This year's program will be condensed into one day, with simultaneous beef, swine, and sheep meetings held, reports Dr. L. L. Wilson, Professor of Animal Science.

The topics will include new aspects of pasture renovation, crossbreeding programs, use of new large hay packaging techniques, least-cost protein supplements, and factors affecting meat quality and how these factors are related to the proposed USDA carcass grading system change.

Besides the above topics, proceedings of other important research, in various stages of completion, will be distributed to those in attendance. Drs. J. H. Ziegler and W. R. Jones, meat scientists at Penn State will present summaries of 10 years of beef quality research conducted at Penn State and at other universities. These results indicate that within cattle fed moderate amounts of grain, and slaughtered between 11 and 20 months of age, present USDA grades and marbling scores do not reflect differences in true eating quality. However, when the proposed USDA grades were assigned to the carcasses, differences in eating quality were still not highly significant between choice and good grades.

Dr. Jones will also lead a discussion on costs of feeding to a particular grade, such as average choice, under current grading standards and proposed grading standards.

Crossbreeding programs will also be discussed, with special reference to small herds, total productive efficiency, specific likes and dislikes of individual commercial producers, and low-concentrate finishing systems, according to Wilson.

Alternative protein supplements will be compared with regard to effectiveness, type of ration, and cost, by Dr. E. H. Cash, Assistant Professor of Animal Science.

New pasture renovation techniques, such as sod-seeding, will also be presented. Sod-seeding has usually been used to introduce legumes to existing grass sods, but Mr. Bill McClellan, Extension Agronomist, will discuss guidelines and results obtained with sod-seeding of grasses and legumes simultaneously.

Pasture utilization reports will include comparisons of different types of grasses and legumes, and different systems of finishing cattle on pasture, to reduce cost.

Producers attending the conference will receive an Animal Science Research summary, which contains summaries of beef, sheep, and swine management research.

Silver Spurs 4-H Club

The Silver Spurs 4-H Club held its monthly meeting at the home of Lenny Matroni. President Randy Glick led the club pledge and read two thank you notes from Mr. John Glick and Valley Lea Riding Club. Also a letter on veterinary medicine was read and discussed.

Secretary, Jim Glick and junior treasurer Sue Baker gave their reports. They were approved as read.

Connie Myers gave a demonstration on "How to Select a Horse." County Council report was given by Cherri Gochnauer.

The 4-H exchange trip to Colorado and 4-H Expo weel. was discussed.

WHAT FEED SHOULD YOU USE?
Red Rose Has The Answer!

The Red Rose Programmed Dairy and Programmed Beef feeding systems help you decide what feeds to use and how much to use — to give the results you want.

The Red Rose Beef Program shows you step by step how to raise steers to market weights easier and efficiently.

These Red Rose Programmed systems can make more money for you. Call on us and let us explain how you can do it!

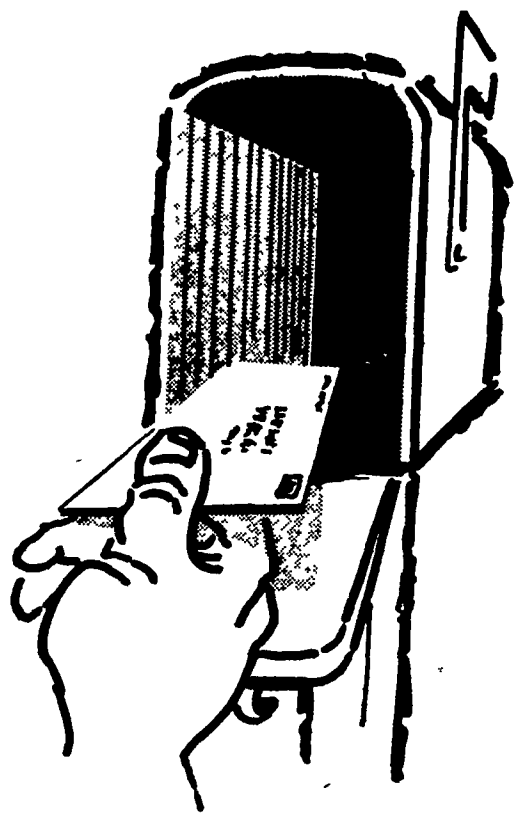
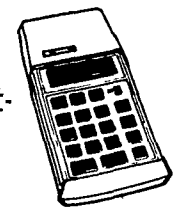
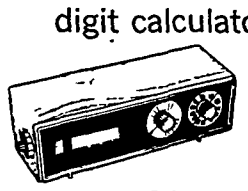
Any way you figure it:
SPERRY NEW HOLLAND
Spreaders and Grinder-Mixers are GREAT BUYS RIGHT NOW!



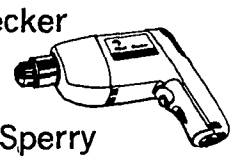
You'll get either a Bowmar electronic eight-digit calculator,





an Admiral AM/FM digital clock radio,

or a Black and Decker ⅜-inch variable-speed drill, free,



when you buy a new Sperry New Holland Spreader or grinder-mixer between January 1, March 15, 1975

Stop in soon to see the extra-rugged, dependable spreaders and grinder-mixers that are the number 1 choice of farmers across North America. And to make a good buy a great buy, we'll tell you how to get your free gift. Remember, this offer expires March 15, 1975.

BUY NOW- Get Cash from Sperry New Holland

These are Sperry New Holland Winter Buyer's Dividend Days! From January 1, to March 31, 1975, you get a cash dividend when you buy an eligible machine from Sperry New Holland. The amount of money you get depends on the machine you buy and the month you buy it. The sooner you buy, the larger the check you'll receive. You'll be sure to have the machine you need for the coming season, too! Remember, this program ends March 31, 1975.

Eligible machines include automatic bale wagons, stack retrievers, balers, mower-conditioners, and precision-cut forage harvesters.

SEE US SOON FOR DETAILS!

Local 4-Hers Win

(Continued From Page 1)

Hempfield High School and has been involved in 4-H work for the past six years. He has taken projects in photography, gardening and geology as well as entomology.

As a member of the Lititz-Manheim Community Club, Alan explained that he was interested in the projects available and decided to try an entomology project.

As a first year project, he was required to make some of the basic equipment for an entomology collection and to collect a few insects for display.

For the past three years, Alan has been adding to his present collection increasing not only the quantity but also striving for unusual insects that he did not have.

This was the third year, Nancy Mays has been in the 4-H entomology project. She has also taken 4-H sewing projects.

When asked how she became interested in entomology, Nancy replied that she had become interested by watching the work her brother had done.

Long Process

Finding the insects is only the beginning of a long process that eventually ends with the insects being displayed in a collection box.

First the insects must be stunned and killed by placing them in a jar that contains ethyl acetate.

"Sawdust is placed in the bottom of a jar," Alan explained, "then a layer of plaster of paris is molded on top. To allow the ethyl acetate to seep into the sawdust, a pin hole is placed in the plaster."

"When the insect is placed in the jar, it is stunned then killed by the chemical vapors," he explained.

The next step involved, is that of pinning or mounting the insect. Pinning involves placing the insect on a small three-tiered board and straightening the antennae and legs by pinning them with long straight pins.

Butterflies must be mounted on a separate board so that their wings can be spread without damage.

Labels are then attached to the insects so that accurate identification can be made. The bottom most label contains the common name of the insect while the second label tells exactly where it was found. The top label gives the locality of where it was captured, the date and the collector.

The insects are then placed in a collecting box which usually has a glass panel for observation and which contains mothballs and alcohol for preservation of the insects.

The collections are judged on their appearance and condition as well as their labeling technique and if all required specimens are present and identified correctly.

Since 1971, Alan Mays has had three first place awards for his collection at the Farm Show and has also received a 4th and 2nd place. This year, Alan also had the first place collection in his division while Nancy captured 1st place in her division also.

The youngsters have also won numerous awards at local 4-H shows and achievement programs.

Along with his 4-H work, Alan is involved in Boy Scouts, the German Club and Choral group in high school as well as being a member of a Junior Science Club at Franklin and Marshall College.

Nancy, who is a student at Centerville Junior High School, is a member of the Girl's Chorus and plays a violin for the orchestra. She has also been involved in the opera workshop.

While entomology is perhaps not the easiest project, Nancy and Alan Mays have spent much of their free time making it worth while by collecting award winning displays.

Between them, Alan and Nancy Mays have caught and mounted over 200 insects. They are shown with one of their prize winning collections.

Along with capturing the insects and pinning them, tags must be labeled and attached for identification.

FARM CREDIT SERVICE

A SURE SIGN OF PROGRESS IN AGRICULTURE

Providing the financing necessary to increase farm efficiency and output is Farm Credit's job. And only job, as it has been for 50 years. Farm Credit loans are available today for any sound farm need from buying a ton of feed to acquiring additional acreage. Farm Credit interest charges are reasonable as they are calculated on the amount of money actually in use. That's why Farm Credit loans cost less.

Beef

(Continued from Page 20)

we grow 100 bushels today. We must learn to live with tight grain supplies and it is pablum talk to try and convince us all that we can turn the spigot and produce enough to feed everything and everyone all they want, of what they want.

And lastly, I really don't think that the Secretary of Agriculture needed to spend the $150,000 for his office lunchroom at the same time he was adjusting the value on food stamps.

Question No. 5. What about cattle and feed prices?

Non-expert answer No. 5. Until our adjustment of our cow numbers is over, we can look for almost no improvement in prices. Cows will continue to sell for under 20c a pound for the next couple of years at least. Calves and yearlings will sell for under 30c. Fed cattle will probably get into the low forties and stay there.

Corn will probably sell for under $3.00 per bushel . . not because it is in surplus supply, but because all of the buyers of corn are in bad financial condition.

After the numbers adjustment takes place by 1979, I believe we will see the following: Feeder calves in the 60c a pound neighborhood; Yearlings around 50c a pound; Fed cattle also around 50c a pound; Corn at $2.50 to $3.00 per bushel; Cows around 30c per pound.

These prices will supply earnings to agriculture, they will provide beef to our American consumers at 25 percent higher cost than we see today, but the consumers will buy it for they will be buying 25 percent less than they are today and they will probably even consider it a bargain as compared to other prices.

4-H Baby Beef

New Holland 4-H Club had their first meeting recently at the home of Jeff and Kathy Martin.

The club has 32 members and only two were missing. This has been the most members in several years.

Elected as leaders were Robert Martin, Mark Yoder, Lester Weaver, John Groff, and Harvey High

Elected as officers were: Tom Denlinger, president; Rich Groff, vice president; Lisa Hoover, secretary; Donna Eberly, treasurer; Bob and Jane Groff, game leaders, Jeff Martin, songleader; and Tim Groff, reporter. Also, Lisa Hoover and Jeff Martin have been elected for County Councilmen.

The next meeting will be held at the home of Lisa and Audrey Hoover.

Farm Show Sales Reach New Peaks

Two sale records were shattered at the State Farm Show last Friday as the prize-winning entries from a week of judging were put on the auction block.

The grand champion steer of the show, owned by Tom Templeton, Ebensburg, sold for a record $6.30 a pound to Myers Foodrite, Dillsburg, York County.

The supermarket bought the grand champion for the third straight year, this time at a cost of $8,379.

Last year a record was set when Jim Wiley of Nottingham sold his steer for $6.15 per pound.

Another record was set at the junior market hog sale when Mike Grube, Elm, sold his three-quarter Duroc barrow for $3.40 a pound to Penn Packing Co. 2300 E. Butler St., Philadelphia.

Mike said he was thrilled with the $775.20 which his champion market hog netted, noting it was more than he expected.

This was only the second year for the junior market hog sale. Last year Thomas Seaman, Grantville, received $1.50 for his grand champion. But the highest price went to Seaman's top lightweight hog which sold for $1.80 a pound.

The reserve champion steer, owned by Bob Hess, Lancaster RD2, sold for $2.25 a pound to Danny George, owner of George's Foodliner, Bethlehem.

George paid $2,688.75 for the 1,195-pound crossbred steer. It was the second year George had purchased the reserve grand champion and the second year he purchased a Lancaster County steer.

Last year he paid $2 a pound for the reserve champion owned by Gary Brubaker, Rohrerstown.

The grand champion 4-H market lamb, owned by Sarah Lynn Brubaker, 2418 Harrisburg Pike, sold for a costly $7.50 a pound to Fox's Foodliner, Middletown.

The 106-pound Suffolk brought Sarah Lynn $795. The record price was $32 a pound paid in 1972.

Gettysburg Is Site Of Pa. Hort Meeting

The State Horticultural Association of Pennsylvania's 116th annual meeting will be held Jan. 28-30 at Gettysburg, Pa. Conference headquarters will be the Sheraton Motor Inn, located 2 miles south of Gettysburg on U.S. business route 15, in the heart of Adams county - a famous Mid-Atlantic apple-growing area.

Program sessions will get underway on Tuesday (Jan. 28) at 9 a.m. and run through midafternoon on Thursday (Jan. 30).

The late-morning session on the final day has been set aside for separate meetings by each participating state organization. Women's auxiliaries of the three state groups will hold separate business meetings on Tuesday and Thursday mornings.

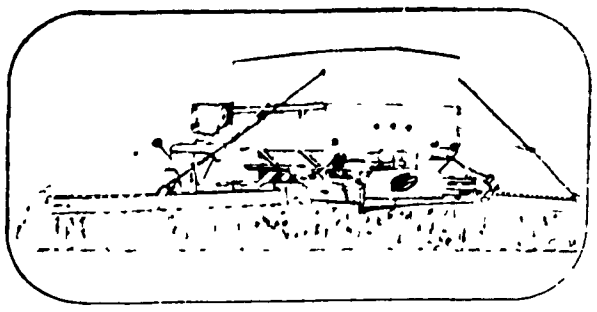
Program topics for the joint tri-state sessions will range from labor camp discussions by growers and government officials to semitechnical presentations by agricultural research workers on new peach varieties, problems with apple rootstocks, zinc nutrition, low-volume spraying and machinery for herbicide application.

A session on economic aspects of the apple-processing industry is set for Wednesday afternoon.

The Tuesday evening program will feature a buffet supper, dance and selection of the Pennsylvania Apple Queen. Participating state organizations will sponsor a joint annual banquet on Wednesday night.

Periodic breaks are scheduled throughout the conference to allow time for viewing commercial exhibits in the hallways.

APPLY LIME ON FROZEN GROUND



Don't hesitate to apply lime, even if the ground is frozen. The freezing and thawing action of Winter helps disseminate the lime, assuring you a properly balanced soil, ready for Spring plowing. And remember, liming pays in extra bushels and tons of crops and forage.

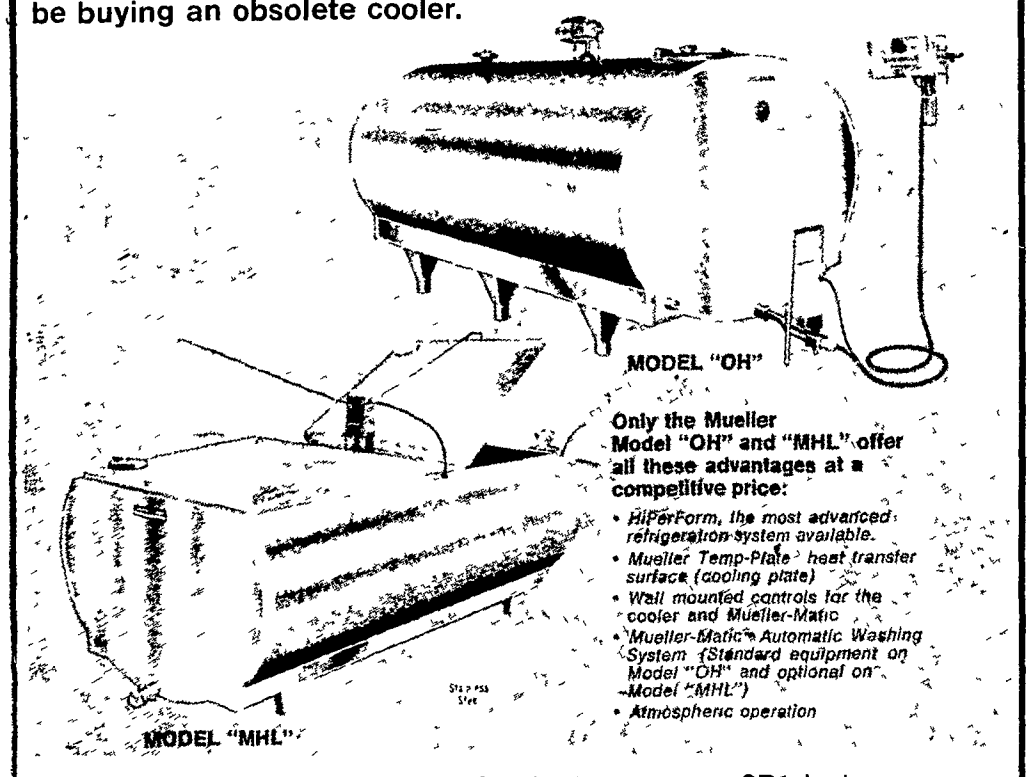
NOTICE

WATCH FOR OPEN HOUSE SPECIALS

COMING FEBRUARY 3 thru 7

The Mueller Models "OH" and "MHL" with HiPerForm make all other bulk milk coolers obsolete.

If you are in the market for a bulk milk cooler and you don't check all the advantages of the Mueller Models "OH" and "MHL," you may be buying an obsolete cooler.



Only the Mueller Model "OH" and "MHL" offer all these advantages at a competitive price:

- *HiPerForm, the most advanced refrigeration system available.*
- *Mueller Temp-Plate heat transfer surface (cooling plate)*
- *Wall mounted controls for the cooler and Mueller-Matic*
- *Mueller-Matic Automatic Washing System (Standard equipment on Model "OH" and optional on Model "MHL")*
- *Atmospheric operation*

PFU Meet

(Continued from Page 1)

favored quarterly adjustments in the support price of milk to make it equal 100-percent of parity.

Among other policy measures adopted by the Farmers Union members were a call for the resignation of U.S. Secretary of Agriculture, Earl Butz; opposition to all forms of regional government; a call for tax reform; restrictions on weather modification, and lowered license fees for farm trucks.

Tony Dechant told the meeting that the world is in desperate need of energy and food policies. "I think we should be doing for food what Henry Kissinger is trying to do for energy," Dechant said. "Food exporting countries should be sitting down with food importers. We should be trying to set prices that will give the farmers good returns without harming the consuming nations. Our federal government is woefully inadequate in this area."

Domestically, Dechant said that livestock and dairy farmers are in trouble. "Grain farmers would be in trouble, too," he commented, "if they had produced according to predictions. We're seeing $4 corn today only because our crop was a third less than anticipated. If the corn crop hadn't been hit by weather damage, corn farmers would be getting a lot less for their grain."

William Mattson told the group that the American farmer can produce more food and fiber than any other farmer in the history of the world. That ability, he said, may well be the salvation of the world. "But we have failed to communicate," Mattson said. "We have not built up a good rapport with our elected representatives or with the people who buy our products.

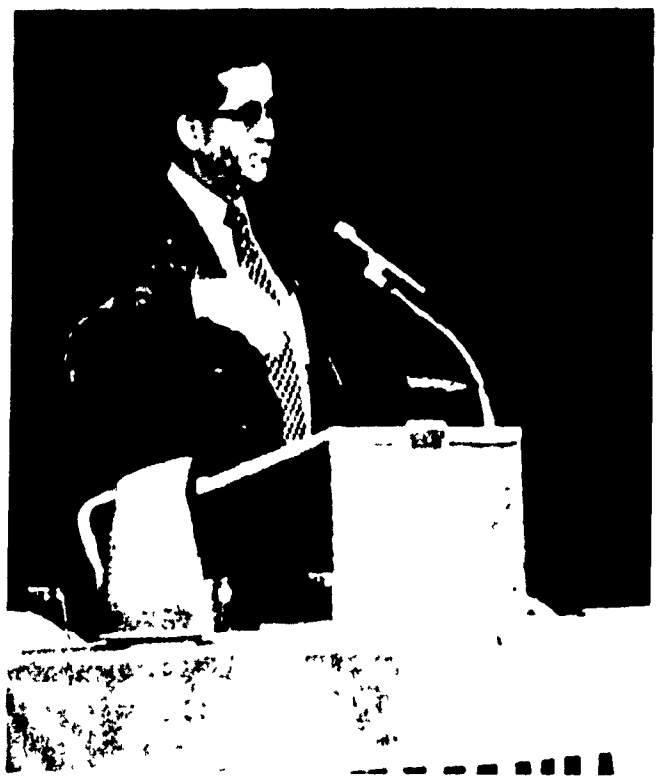
"We're getting better, but we have a long way to go. We've got to try harder to communicate with consumers, to develop a sense of kinship with them. After all, farmers are consumers, too. In fact, agriculture is the largest single consumer of steel, petroleum, rubber and chemicals. Let's let the people who make these things know that we're their best customers.

"Too often, we tell our story to ourselves. That's good, but we can't let it stop there. We've got to tell it to the consumers, too, and then we've got to tell it to the legislators."

Secretary McHale told the meeting that Pennsylvania was going to use federal funds to set up producer-consumer cooperatives to get food from the farm to the table. He said these demonstration projects would be designed to show that chain stores are enjoying enormous profits at the expense both of the consumer, who pays too much, and the farmer, who is paid too little.

As an example, McHale said he will soon be releasing a study which shows that a farmer can butcher a yield grade 3 steer, sell the top cuts at retail, then actually pay consumers 10-cents a pound for taking away the less choice cuts in the form of hamburger.

McHale also said that the Pennsylvania Milk Marketing Board was never going to do much of anything. "The board has never set the price of milk anyway," he said. "Now, 90 percent of the milk sold in Pennsylvania is sold under federal order prices. That's what sets the price of milk."



Forney Longenecker, Lititz, addressed the annual convention of the Pennsylvania Farmers Union on Monday and Tuesday in Harrisburg. Longenecker is the state director for the group which has close to 1800 members.

PANCAKES & SAUSAGE FROM 9 A.M. - 3 P.M.

Cut your feeding costs with AUREO S 700 and AUREOMYCIN

32 pounds extra gain in 166 days—9% faster rate of gain—5% less feed per pound of gain—a $7.79 return per $1 invested—that's the record produced in five trials using AUREO S 700* during the first 28 days followed by AUREOMYCIN chlortetracycline

This is the reason cattlemen across the country use this winning combination of disease control and growth promoting additives in their feeds

AUREO S 700 helps maintain gains in the presence of respiratory disease such as shipping fever. AUREOMYCIN promotes growth, improves feed efficiency, aids in the prevention of liver abscesses, helps prevent foot rot, and aids in the reduction of bacterial diarrhea

Now is the time to put AUREO S 700 and AUREOMYCIN to work for you in your cattle feeding operation. Available in manufactured feeds or in Crumbles form. American Cyanamid Company, Princeton, New Jersey 08540

*AUREO S 700 is the registered trademark for a premix of AUREOMYCIN® chlortetracycline and SULMET® sulfamethazine. Withdrawal: AUREO S 700, seven (7) days before slaughter. No withdrawal required for AUREOMYCIN when fed at levels not to exceed 350 mg. per head daily.

Put more GROW POWER in your feed

Reba Ranck

A Busy Lancaster County Farm Wife

by Mrs. Charles McSparran Farm Feature Writer

Mrs. J. Ray (Reba) Ranck, Paradise RD1, Lancaster County, is one who enjoys her evenings at home with her family, who at the same time loves to meet people and is interested in the success of their farm. She not only helps with the farm work but also does office work at home and takes in tourists to add to the farm income.

Mrs. Ranck, accompanied by her friend Mrs. Roy (Ruth) Shertzer of Lancaster RD6 and Mr. and Mrs. Robert Spahr of Lititz RD3, attended the first National Farm Wife Forum November 12 - 14 in Milwaukee, Wisconsin. They read about this convention for women in the Farm Wife News. It was arranged by Roy J. Reiman, the publisher of that magazine, who had been a farm boy from Iowa. Through Mr. and Mrs. Ranck's going on a tour to Hawaii sponsored by this magazine in 1972 they became very good friends of Mrs. Steven Gross, a daughter-in-law of Mrs. Harold Gross of York County, Pa., near Manchester, who spoke at the convention on the subject "How To Collect Recipes For A Cookbook." Mrs. Gross, who served as treasurer of a cookbook committee for Farm Women Society 6 of York County four years ago and has kept the cookbooks at her farm home since that time is vice-president of her society. This cookbook has 600 pages and sales of them will soon cease and the members will take up the project of selling Pa. Farm Women Society plates. Mrs. Gross arranged a trip for 27 people, most of whom were members of the Pa. Farmers Association or Farm Women Societies of York, Lebanon, Dauphin, Berks and Lancaster Counties. Mrs. Ranck, Mrs. Shertzer and Mr. and Mrs. Spahr joined this group in York and together they traveled by bus to Baltimore Airport then flew to Milwaukee Airport on November 11. They then went to convention headquarters by bus. One other lady from western Pennsylvania also attended the convention.

Over 1700 people attended the convention and came from over 30 states and Canada. The forum was geared to women so most of the people were women. A few men accompanied their wives and enjoyed the tours which were arranged for the men.

Some organizations represented there were: Women For The Survival Of Agriculture, United Farm Wives, American Farm Bureau Federation, Farm Women, National Grange, National Farmers Organization, American Milk Producers, Cotton Wives, Porkettes, Ohio Farm Bureau Women, Cow Belles, National Wool Growers, Wisconsin Homemakers, Kansas Wheathearts and Women's Clubs.

There were four sessions for different seminars of interest to women on the program for November 12 and 13. Laura Heuser, president of Women For The Survival Of Agriculture in Wisconsin, was the opening speaker Tuesday morning. There were several sessions on sewing and a fashion show. Some subjects covered in the seminars were — "Income Besides Farming", "Land I[illegible] And Tax Reform", "Antiques" and "Are You Ready For The Rains" by Joel Lee. It had to do with estate planning and wills. There were luncheons Tuesday and Wednesday. Pat Leimbach, who wrote the book "A Touch Of Blue Denim" was the speaker for the Wednesday luncheon. This luncheon program was broadcasted on the one hour radio program of Orion Samuelson, Chicago's WGU farm director. Anita Bryant was the entertainer for the Wednesday night banquet. President Ford sent a telegram to the convention.

Thursday morning the organization known as "Women For The Survival Of Agriculture" held a meeting to which all were invited to attend. In that meeting they formed an organization which was a coalition of all farm women in the United States and they elected six representatives across the nation. Mrs. Gail McPherson from near Fawn Grove in York County was elected to represent this area. In fact she was the one who suggested they call this national group "American Agriwomen." Their purpose is to educate the public about farming. Some of the group went on a three hour tour of Milwaukee which included the three horticulture domes which are filled with wonderful floral spectacles.

The tour sponsored by Mrs. Gross returned home Thursday afternoon. All in all it was an invigorating experience and Mrs. Ranck is hoping the forum will come east and make it more available to eastern farm wives.

Rancks' 100 acre farm on Black Horse Road in Paradise Township has been in the family for four generations. Ray's great grandfather, Jacob E. Ranck, built the house and barn in 1863. He was succeeded in owning and operating this farm by his son John K. and he in turn by John K.'s son John H. Ranck. Ray was born and raised on this farm. It has a 13 room brick house on it which has been modernized and is surrounded by huge old shade trees. Ray and Reba also own 25 acres of woodland near their farm where they have a picnic area, including a fire pit and a picnic table.

Rancks grow 40 acres of corn, 25 acres of hay — half mixed and half alfalfa and this year 15 acres of wheat. Last year they had a few soybeans and on occasion some oats or barley. Ray has his combining and silo filling done by custom work. He has a herd of 63 Holsteins, 36 of which are milking cows. A few are registered and he is building toward an all registered herd. He is enlarging his stable at present time to accommodate 48 cows. He is doing some of the roof work, part of the concreting, the plumbing and electrical work himself. Reba helps in the field and says "I love it." She does most of the straw and hay baling and picks most of the corn. She has done some spring harrowing. They have five sheep and Ray shears them. They raise their own lambs and have sold a few. They hire David Combs, a 15-year-old student who helps after school in the evenings and some Saturdays. He also helps in the summer. David lived in New York City until five or six years ago when his family moved to the community. His older brother worked for Rancks for several years.

[Continued on Page 36]

Mrs. Ranck's number one hobby is knitting. She is making an afghan and knitted the two sweaters. She also crochets afghans such as the one behind her which her mother made. She has the program for the first National Farm Wife Forum beside her.

Reba adds this souvenir pitcher from Milwaukee, Wis. to her collection of over 100 pitchers.

Mrs. Reba Ranck, Paradise RD1, at her desk busy with her notary work. She also does office work for Sauder Chevrolet Co. of Manheim here and keeps books for her tourist business.

Farm Wife

[Continued from Page 34]

When you approach this well-kept farm you see the sign "Rayba Acres Farm, Notary Public and Guest Accommodations." Reba has been doing notary work for 8½ years. This work consists largely of notarizing signatures, filling out applications for license plates, driving permits and car titles. She says she tries to be home Fridays and Saturdays as they are big days as are Mondays. Her earliest caller was at 3 A.M. but generally people come to secure her services between 7 A.M. and 10 P.M.

Mrs. Ranck also does bo kkeeping for Sauder Chevrolet Company in Manheim at her home. She does bookwork plus a financial statement for the end of the month. She does this work mostly in her spare time but puts in about 40 hours a month at it, largely the first ten days of the month. She says her home work comes first but naturally the office work comes first when her month end work deadline is nearing. She has worked for Sauders for 12 years.

Another business Mrs. Ranck is conducting is lodging tourists. She is beginning her fifth season. She lodges people throughout the entire year. She has accommodations for 12. There are three guest rooms, four when needed, and she has handled as many as 14 at one time. Being so near the tourists attractions of Lancaster County she gets a lot of people for just a few nights but she also has a number of them return for just the relaxation of living on the farm. She doesn't prepare meals for any of them but this is not a problem since there a number of good restaurants nearby. She is registered with the Penna. Dutch Tourist Bureau and people who have been at their place tell others She has entertained guests from 24 states and from 18 other countries

Reba grew up on Kauffman Fruit Farms, just east of Bird-in-Hand on Route 340. She is the only child of Mr. and Mrs. John E. Kauffman, Bird-in-Hand RD1. A brother and three nephews are also in the business at the present time. They have 100 acres mostly in peaches and apples but they also have cherries, pears, blue and white grapes and a few plums. They have a cider press and make cider to sell Reba's father is in charge of their locker plant and does custom work in cutting meat for people and also tends to their grocery store. Reba went to the Weavertown one-room school for four years then to Weavertown Mennonite School. She graduated from Lancaster Mennonite High School. She worked for the John N. Sauder Auto Company of New Holland for 2½ years before marriage. They sell Chevrolets and Oldsmobiles.

Reba and Ray have three children. Robert, "Robbie", is 10 years old and is in fourth grade at Locust Grove Mennonite School. His chores consist of feeding the sheep, feeding the heifers, feeding the cows hay and bedding the cows and heifers on Sundays and occasionally other times. He hopes to get in the 4-H Holstein Club this year. He took piano lessons.

Rhonda is 7 and in second grade at Locust Grove School. She likes to draw and paint. She made a nice in-depth snow scene before Christmas. She helps with feeding at the barn. Both she and Robbie had calves they raised. She also helps her mother in the house.

Ryan is their active two-year-old son.

Rancks are members of Ridgeview Mennonite Church, north of Intercourse. Reba belongs to the sewing circle which meets once a month. She says "I enjoy that." They do quilting, knot comforters, make dresses, pajamas, diapers, hem blankets and make health and sewing kits. They get their materials cut ready to sew from Paradise Cutting Room, on the Paradise Mennonite Church lot, and take the finished products to the Mennonite Central Committee at Akron. Reba used to teach the primary Sunday School class. She and Ray sang in Christmas choruses. Ray was Sunday School Superintendent for three years and the third year was on the church council. He did teach one of the adult Sunday School classes but substitutes for the various adult age groups now. Reba was on the staff of "Maple Breezes", their church's district publication, for five years and editor one year. The staff gets together one day a month to edit it. Their district comprises their church, a church they started in New York City, two in North Carolina, one in Tennessee and one in McKean County, Pa.

Ray belongs to the Pa. Farmers Association, Pa. Holstein Association, the Holstein-Friesian Association and Inter-State Milk Producers. He was president of the local in 1972 and 1973. He was a delegate to Philadelphia in 1973 and Reba went also. He is in DHIA. He had 611 pounds of butterfat and 15,557 pounds of milk rolling herd average ending September 1974. He had 619 pounds of butterfat in December.

Ray and Reba have been active in Locust Grove Parent Teacher Fellowship. They go to most of the meetings and Reba was cashier at their auction in July for their building fund. She was treasurer of Paradise Elementary PTO two years also.

Rancks have their work done by 6 P.M. and enjoy their evenings at home. Reba plays the piano. She also does fancy work in the evenings. She says "I love to knit, it's my number one hobby. I love to quilt. I do some sewing. I crocheted two afghans. I've done some crewel and regular embroidery." She knitted several afghans, sweaters, a lap robe and a half dozen cap and scarf sets. She made several for gifts. She has made 6 or 8 quilts, either appliqued or embroidered, and donated some to the Mennonite Relief Sale. She also makes needlepoint pillow tops. Reba attributes her creativeness to her mother. Mrs. Kauffman makes all her own clothes, makes a lot of quilts for Reba and her children and for the relief sales. She also makes afghans for the relief sale. She knits, crochets, does embroidery and needlepoint.

The family enjoys picnicing on their picnic grounds in the summer and going bicycle riding together. Mr. and Mrs. Ranck and the two older children have bikes and Ryan rides on a seat with his mother. They also rent a camper to go camping in the summer. They went camping to the Great Smoky Mountains in North Carolina, Black Water Falls in West Virginia and the Poconos. They flew to Hawaii with 200 others on the tour in 1972 and have traveled a lot by car. Reba also traveled before she was married. She had been in all but four of our 50 states. In connection with traveling she started collecting little pitchers in 1953 and by now has 115 or 120. Most of her pitchers are souvenirs from places she has been. The last one she got in Milwaukee last November.

Reba enjoys working with her flowers. First to bloom are crocus, then daffodils, tulips, annuals, begonias and she has a lot of mums in the fall.

They have a nice garden in the summer. Ray cultivates it and Reba picks the vegetables and freezes them. She also freezes their strawberries and makes strawberry jelly. She cans 150 to 175 quarts of fruits, mostly peaches.

Mrs. Ranck says she's a meat and potato cook because that's what her family likes. She isn't much for trying new recipes but the following are family favorites.

SHOO-FLY CAKE

4 cups flour
2 cups brown sugar
¾ cup shortening
Mix together. Reserve 1 cup for top of cake.
Add to crumbs:
1 cup molasses (King syrup)
1 tablespoon soda
2 cups boiling water
Pour into greased 13 x 9 inch pan. Sprinkle crumbs on top. Bake at 350 degrees for 30 minutes.

TROPICAL PUDDING

3 eggs
½ cup sugar
3 tablespoons flour
Juice from 1 No. 2½ or a No. 2 can pineapple chunks
Cool till thick. Cool.
Mix with pineapple chunks:
2 cups miniature marshmallows
3 oranges
¾ to 1 cup whipping cream whipped or 2 cups Cool Whip.

CHILI

1 pound ground beef (optional - onion if desired)
1½ teaspoons salt
1½ teaspoons chili powder
3 tablespoons flour
1 6-oz. can tomato paste
3 cups water
1 30-oz. can kidney beans
Brown beef, stir in salt, chili powder and flour. Add tomato paste and beans. Thin with the water as needed. Simmer 45 minutes.

GRAHAM CRACKER PUDDING

Line a glass dish with ground graham crackers mixed with melted butter.
1½ cups brown sugar
2 tablespoons butter
¼ cup milk
Cook 5 minutes.
Add 3 cups milk.
Mix together:
2 beaten egg yolks
4 tablespoons flour
2 tablespoons cornstarch, gradually adding 1 cup milk
Bring to boil for few minutes. Be careful to add last four ingredients before the other mixture is very warm. Add 1½ teaspoons vanilla.

CHICKEN POT PIE

1½ pounds meaty chicken pieces
2 or 3 potatoes
2 teaspoons salt
Water to cover
Cook chicken in salt water until tender, cool slightly. Take meat off bones and cut into bite-size pieces. Add walnut size pieces of potatoes. Bring to rapid boil and drop in pot pie squares.

POT PIE DOUGH

2 cups flour
½ teaspoon salt
2 eggs (break up with fork)
2 - 3 tablespoons water.
Roll very thin.

Home on the Range

We thank those readers who have been sending in recipes. All readers are invited to share their favorites with us and other readers by sending recipes to Home on the Range, Lancaster Farming, Box 266, Lititz. When we receive your recipe, we'll send you a brightly decorated potholder.

This week we received a letter from a reader who is interested in having some recipes that were used during the Revolutionary period or during the years 1775-1785. If you have any recipes that would fit this catagory, please send them along to us.

xxx

To remove candle wax from washable fabrics, place stain between clean white blotters or seveal layers of white paper towels or facial tissues and press with warm iron. Sponge with grease solvent. (from the York Co. Extension Service)

Pumpkin Chiffon Pie

2 cups cooked pumpkin
2-3 cups brown sugar (packed)
3 eggs separated
½ cup milk and
½ cup water
1 package gelatine
1 teaspoon lemon flavoring
¼ teaspoon cinnamon
¼ teaspoon ginger

Cook egg yolks, pumpkin, sugar and milk and gelatine soaked in water in the top of a double boiler. Stir often until slightly thickened. Allow to cool. When it begins to set, add stiffly beaten egg white with one-third cup white sugar added, and also add ½ cup whipped cream. Pour into 2 baked 8 inch pie shells.

Mrs. Harvey Nolt
Ephrata

xxx

Golden Mashed Potatoes

Cook an equal amount of carrots and mash with potatoes for a new and different taste.

Mrs. Edwin Rissler
New Enterprise

xxx

Bean Soup

1 pound (2 cups) navy beans, dried
1 meaty ham bone (1-1½ pound)
1 cup cubed potatoes
1 cup thinly sliced celery
1 cup chopped onion
1 clove garlic
1 cup cubed carrots
1 small bay leaf

Cook beans in 2½ quarts of warm water for two minutes. Remove from heat. Let stand 1 hour and add ham bone, minced garlic and bay leaf to beans. Cover and simmer two hours or until almost tender. Add vegetables and salt and pepper to taste, simmer 1 hour. Remove ham bone and cut off meat. Dice meat and add to beans. Reheat to almost boiling. Remove bay leaf.

Mrs. Edwin Rissler
New Enterprise

xxx

Pineapple Upside-down Cake

½ cup butter
1 cup brown sugar
sliced pineapple
2 tablespoons large whole pecans
1 cup sifted flour
1 teaspoon baking powder
⅛ teaspoon salt
3 eggs, separated
1 cup granulated sugar
5 tablespoons pineapple juice

Melt butter in large baking pan. Spread sugar evenly in pan and arrange pineapple slices on sugar, filling spaces with pecans. Sift flour, baking powder, and salt together. Beat egg yolks until light adding sugar gradually, add pineapple juice and sifted flour. Fold in stiffly beaten egg whites. Pour batter over pineapple. Bake in moderate oven (375) 30-35 minutes. Turn cake upside down on cold plate. Serve with whipped cream. Makes 1 (9x9 inch) cake.

Rachel Fisher
Ronks

xxx

Walnut Chiffon Cake

Measure, level, and sift together into bowl:
2 cups cake flour
1½ cups sugar
3 teaspoons baking powder
1 teaspoon salt

Make a well in middle and add in order:
½ cups salad oil
7 unbeaten egg yolks
¾ cup cold water
2 teaspoon vanilla

Beat until smooth, then add 1 cup very finely chopped nuts. Measure into large bowl, 1 cup egg whites and ½ teaspoon cream of tartar; whip until very stiff peaks form. Pour egg yolk mixture gradually over egg whites folding gently just until blended. Bake 1 hour and 10 minutes. Bake in ungreased tube pan. Start with slow oven 300 degrees increasing slowly to 350 degrees.

Ephrata

xxx

Graham Cracker Pudding

18 graham crackers
¼ cup sugar
½ cup butter

Break or roll crackers. Add melted butter and sugar. Line a dish with these crumbs saving a few to put on top.

Filling:
¾ cup milk
3 egg yolks
1 small package of lemon or orange jello
½ cup sugar

Bring milk to a boil. Add egg yolks and sugar. Remove from heat and add jello. Allow to cool and partly set, then fold in 3 egg whites beaten stiff and ½ to ¾ cup cream, whipped. Pour in dish lined with crumbs. Sprinle with remaining crumbs and chill.

Mrs. Paul Reiff
New Holland

xxx

Potato Cheese Pie

Crust:
2-2½ cups mashed potatoes
2 tablespoons flour
1 teaspoon baking powder
1 egg
2 tablespoons melted butter
salt and pepper

Filling:
2 eggs
1 cup milk or cream
salt and pepper
¾ cup grated cheese

Mix the ingreidents thoroughly and pat into a large greased pie plate as if dough. Beat the eggs, stir in cream and seasoning. Pour this into the potato crust and sprinkle the top with grated cheese. Bake at 350 degrees for 20 minutes or until a knife inserted in center comes out clean.

Mrs. Amos Beiler
Kirkwood

xxx

Meat Production Down

Statewide, total red meat production during November 1974 dropped 4 percent from a year ago, and was also 4 percent less than October 1974. Slaughter of meat animals was up for cattle and calves, but down for hogs, sheep and lambs according to the Crop Reporting Service.

Cattle slaughter increased 13 percent, calves 18 percent, while hogs decreased 19 percent with sheep and lambs down 16 percent.

Nationally, total red meat production was up 2 percent from November a year ago, but 9 percent less than October 1974. Beef production increased 11 percent from November 1973 and veal was 60 percent higher. Hog production was down 2 percent, lamb and mutton down 19 percent from a year ago.

AGWAY

CALORIC® GAS RANGE

CALORIC AUTOMATIC PILOTLESS IGNITION
only "on" when you need it
cool - clean - conserves gas

SAVES MONEY ON GAS BILLS
Caloric Ranges with PILOTLESS Ignition use up to 30 percent less gas than modern ranges with standing gas pilots.

CONSERVES GAS ENERGY
PILOTLESS Ignition is trouble-free — no pilot to blow out, and with no gas pilots at all there will be fewer service calls.

SAVES MONEY ON SERVICE CALLS
The PILOTLESS Ignition System works only when needed, saves because there are no gas pilots to burn constantly.

KEEPS KITCHEN COOLER
PILOTLESS Ignition means a cooler kitchen when range is not in use. Heat from standing gas pilots is eliminated.

Wedding Announced

The marriage of Violet N. Landis to Lester H Brubaker took place on Saturday Jan. 11, 1975 at 3 P.M. in the fireside Room at Willow Valley Restaurant. A reception for approximately fifty invited guests followed. The Rev. Emery Herr shared in a bried meditation. The Rev. Eric Crichton performed the ceremony.

After spending some time in Florida they will reside at 1895 Rockvale Rd., Lancaster, Pa.

Farm and Home Foundation Meet Set for Jan. 23

The Farm and Home Foundation of Lancaster County will hold its annual meeting at 6:30 p.m. Thursday, Jan. 23, at the Farm and Home Center auditorium.

Calvin D. Johnson, special consultant on public affairs for Sperry New Holland, will be the featured speaker. His topic will be "Opportunities Unlimited."

In addition, Mrs. Mary Hawk will sing several songs.

Reservations for the dinner meeting must be made by Monday by calling the Farm and Home Center.

You're Never Too Old To Hear Better

Chicago Ill A free offer of special interest to those who hear but do not understand words has been announced by Beltone A non operating model of the smallest Beltone aid ever made will be given absolutely free to anyone requesting it

Send for this non operating model now Wear it in the privacy of your own home to see how tiny hearing help can be It's yours to keep free The actual aid weighs less than a third of an ounce and it's all at ear level in one unit No wires lead from body to head

These models are free so we suggest you write for yours now Again we repeat there is no cost and certainly no obligation Thousands have already been mailed so write today to Dept 9126 Beltone Electronics 4201 W Victoria Street Chicago Ill 60646

LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

Small Appliances More Economical Energy Users

Using your portable electric appliances can help save energy and cut down on your electric bill. These versatile appliances are more efficient to use than the range.

A toaster, for example, is much more efficient than using the oven for making toast unless you need a large quantity at one time. Then, the broiler in the oven is more efficient.

Countertop ovens are energy savers, too, particularly for small families. They're ideal for small quantity baking or oven cooking and for reheating small quantities of food or individual frozen dinners. And these small ovens are made to order for baking a few biscuits, a small cake, pan of rolls, or one or two baked potatoes. Because they're smaller than the range oven, countertop ovens take less time to preheat and use less electricity to maintain the desired temperature.

The electric skillet or frypan is another efficient appliance. Since the heating element is thermostatically controlled and built in the utensil, the frypan uses only the amount of energy required to maintain the temperature you set.

The new, popular slow cookers are real energy misers. Similar to the deep well cookers that used to come on electric ranges, this new portable version is just as thrifty because it takes a very small amount of electricity to maintain a gentle simmer. Homemakers having full time jobs find slow cookers especially helpful in meal preparation. Because of its termostatic control, the cooker will simmer foods all day long without attention and there's very little heat loss.

An electric percolator or coffeemaker is an energy saver, too, especially if a non-automatic coffeemaker does not fit the range surface unit properly. Many coffee pots are smaller than the range unit and waste heat. If you like a cup of coffee for a mid-morning break or lunch, you can enjoy good coffee and save electricity by pouring what's leftover from breakfast into a vacuum bottle to keep hot.

Here's another energy-saving tip if you use a drip coffeemaker or make instant coffee. Don't heat a full teakettle of water if you need only one or two cups - that's a waste of energy.

Generally, well-designed portable appliances are very efficient and when used properly, don't waste energy. Just remember to disconnect the appliance when cooking is finished.

How To Buy Thermal-Knit Underwear

Lower temperatures in homes and long periods of cold weather have created a growing demand for thermal-knit underwear.

Thermal-knit underwear is a much warmer version of the old-fashioned "Long John." Most thermal-knits are constructed with waffle or honey-comb-like pockets that trap a layer of air in the fabric. This layer of air acts as an insulator keeping cold air out and body heat in.

Thermal-knit underwear is available in three different knits - circular, rib and Raschel. The face and back of circular - and rib-knit garments are made in a continuous process and have no side seams. Raschel knits are the strongest thermal-knits available, making them suitable for active cold-weather sports.

Here are some points to look for when buying thermal-knits:

- Taped seams in the shoulder area help stop stretching and sagging.
- A flat seam is likely to be more durable than a bulky seam made with a single row of stitching.
- Seam ends should be reinforced for durability and strength.
- Sewn in panel inserts in the crotch area may give greater comfort than single panel construction.
- Underwear that absorbs perspiration quickly and lets it evaporate rapidly won't trap perspiration and leave you feeling cold and clammy. Cotton is now of the most absorbent fabrics available. But, keep in mind that a cotton blend, such as polyester and cotton, is significantly stronger than a 100 percent cotton material.
- Make sure you get a proper fit when buying thermal-knit underwear. A thermal-knit that doesn't fit right won't keep you properly warm. A somewhat loose fit is better than a snug fit as thermal-knits may become thinner and, thus, less warm when stretched.

Farm Women Societies

Society 1

The Society of Farm Women 1 met at the home of Mrs. J. Clayton Sangrey, Jan. 4.

Richard Warren presented a program entitled "A Covered Bridge Story."

Mrs. Leon Ulrich, new club president, presided at the meeting. Other officers are: Miss Rachel Bollinger, vice president, Mrs. Elmer Hershey, recording secretary, Mrs. Willis Bucher, corresponding secretary, Mrs. John Newcomer, treasurer; Mrs. Simon Snyder, music director and Mrs. C. Neil Clark, news reporter.

During the business meeting Mrs. Paul Kurtz and Miss Bollinger were appointed as delegates to the State Convention.

The next meeting will be held at the Twin Pine meeting room. Mrs. Ann Mae Kulp will present the devotions.

Mrs. Leon R. Ulrich will present the program "The Best of Mexico."

Hostesses will be Mrs. Ulrich and Miss Bollinger.

Society 13

Farm Women Society 13 met Friday evening 7:30 p.m. at the home of Mrs. Irvin Leaman of Ronks with 24 members present.

The meeting was called to order by Mary Ann McClenaghan with group singing. Mrs. Linda Eberle gave devotions followed by the flag salute.

The Ways and Means committee announced a bakeless bake sale for the February meeting and a suggested Bazaar to be held in October. A birthday collection box to help support expenses for the sunshine committee was discussed.

A report of the State Farm Women's convention was given by Mrs. McClenaghan and Mrs. Hirshmann after which the meeting was given over in charge of the hostess.

Speaker for the program was Estelle Snader, R.N. who spoke on family health.

The meeting was adjourned following refreshments.

Society 14

Farm Women Society 14 met Wednesday afternoon at the home of Mrs. Larerne Mylin in Quarryville.

Twenty-two ladies attended and sewed 10 dozen cancer dressings.

A representative from the Volunteer Services, Mrs. Eleanor Barnes, gave a talk on the work of the service and articles that could be made.

Members of the Society sewed 345 pieces of sewing at the General Hospital recently and will be embroidering a quilt at the home of Mrs. Edith Metzler on January 23rd at Noon. No refreshments will be served.

The next meeting will be February 12th at 1:30 p.m. at the Ambassador for Christ Inc. in Paradise. The movie "Queen of the Dark Chamber" will be shown.

Society 21

Farm Women Society 21 met January 9, 1975 at the home of Mrs. Wilmer Kreider, RD2, Nottingham, Pa. with Mrs. Samuel Groff and Mrs. Richard Jackson as co-hostess. President, Mrs. Frank Aument led the business meeting. Mrs. Richard Risk and Mrs. James Long led the group in a program of games.

The next meeting will be held February 13, 1975 at the home of Mrs. Howard Steinberg, RD2, Quarryville, Pa. A demonstration on making artificial fruit will be given by Mrs. Robert Bucher.

Society 22

Farm Women Society 22 met Tuesday afternoon at the home of Mrs. Harold Ranck. Mrs. Henry Hess served as co-hostess. Mrs. Vi Weller led the devotions.

Doris Thomas, Extension Home Economist spoke on "Safety in the Home."

Thank-you notes from the recipients of Christmas cookies were read. Naomi Wenger and Ann Diller reported on the State Convention in Harrisburg.

The next meeting will be held at the home of Mrs. Jay Landis. (No date given)

THE GOOD WORD from the Bible

May God be gracious to us and bless us and make his face to shine upon us.

That they may be known upon earth, thy saving power among all nations.

The price of food may still be going up, but apparently some people still have the money to afford variety foods. By this, I mean the kind you would find in a delicatessen shop where salads, relishes and cheeses and prepared meats are sold.

Last week I had some extra time to spend in a supermarket while I waited for my daughter to pick me up, during a storm. Some of the items on display surprised me. One was "sun chokes" which the package explained were really Jerusalem artichokes. Now I've grown these for years but never realized that they can be chopped in salads and eaten raw We always cooked them and then pickled them to get a pleasing taste

Another cellophane wrapped article was "souse". I've always considered that an old-fashioned food consisting of jellied pigs feet. However, this package contained bits of tongue and celery and red pepper to make it attractive.

xxx

Do we surround ourselves with too many trite and commonplace remarks in order to protect ourselves from others? Many people live under a shell and are protected by "I'm fine", even though they have a toothache and a headache. Others will say "I'll be out of town" and not bother to explain that their favorite Aunt Sally died and they are torn apart over it. Still others say "I'm on an errand," and not explain that their presence in a store is caused by a clogged drain

Maybe those folks are honest and maybe they are only partly honest at least they don't trust others to see what their lives are really about and what really makes them tick Some would say 'Thank heavens we don't need to listen to others big and little problems" But in order to love ourselves don't we need to share and allow other to love us'

Berks County Society 1

The monthly meeting of the Society of Farm Women 1 of Berks Co. was held at the home of Sarah Marsteller. Before the meeting Harriet Boyer spoke on the Morlatton Medical Center, which will soon be under construction.

Our President then called the meeting to order. Our hostess read the 9th, Psalm, followed by The Lords Prayer and the salute to the flag. Eighteen members answered to roll call The minutes were read and approved. The treasurer gave her report.

Thank you cards were received from Mr Thompson and The Hamburg State School Bills were ordered paid. A motion was made, seconded and approved to again make Easter eggs The first candy making will be February 10. The Welfare Comm was authorized to purchase a wheelchair for Berks Heim It was suggested that the Trip Comm. look into the possibilities of a trip to the Philadelphia Flower Show.

Discussion on the proposed Medical Center then followed A motion was made, seconded and approved to purchase bonds totaling $300.

An invitation was received from Group 5 for a night of entertainment to celebrate their 10th anniversary, to be held at Womelsdorf, Tuesday evening March 18, at 7:30

A report was made on the State Convention held at Harrisburg Twelve members from Group 1 attended Berks Co. had charge of the Memorial Service Statewide there 4,192 members, twenty-five of these are ninty years or older.

The Spring Rally will be held April 30 hosted by Dauphin Co , at the Hershey Motor Lodge

Seventy bedpads were sewn for Berks Heim by the members during the meeting. There being no other business the meeting was adjourned

Refreshments were served by the hostess The next meeting will be held at the home of Emma McLean

Society 19

Farm Women Society 19 held their January meeting at the home of Mrs Charles Musser, 30 Donnerville Road, with 30 members and two guests present.

The officers elected for the new year were in charge. They include Mrs. A. Ross Weaver, Jr., President; Mrs. Harold Saylor, vice-president; Mrs. Isaac Miller, recording secretary; Mrs. J Lloyd Rohrer, treasurer; Mrs. Charles Musser, assistant treasurer

Mrs. J. Lloyd Hollinger conducted devotions which centered on "New Year for Christ." Roll call was taken with members giving their weight on their wedding day

A bus trip to Ice Capades with husbands is arranged for February 15. The bus trip to Radio City April 5 was discussed.

The State Convention reports were given by Mrs. Kenneth Warfel and Mrs. Harold Saylor. Mrs. Robert Spahr and Mrs. John Ruhl represented the group in the state "Sew a Long Dress" fashion parade

The annual auction was held with lots of goodies and delicious foods selling at record prices with Mrs. Harold Saylor as auctioneer.

The next meeting will be held February 8, 1.30, at the East Petersburg Church of the Brethren with Mrs. J Vernon Newcomer serving as hostess. The program will be a slide presentation on "Our Trip to Africa" by Mrs J Irvin Denlinger

ORGANIC LIVING

By

Robert Rodale

YOU NEED GREEN IN YOUR LIFE

Notice anything missing in your life these days? If you have, but can't quite put your finger on it, try thinking green. Yes, green.

Much of the country remains locked in the annual winter freeze, which has a month or so left to run. In some areas, once-green lawns remain buried under mounds of icy snow, awaiting spring. Trees stand stark against the grey winter sky, also waiting for the first warm breezes to stir the dormant sap under their outer bark.

We can be thankful that spring is on the way because it means green. In our lives, the color green occupies a very important niche, both physiologically and psychologically.

In the first place, our eyes pick up the green and yellow hues faster than others. Dr. Kenneth Graham, a psychologist on the faculty of Muhlenberg College in

Allentown, Pa., believes that the human ability to see green quickly evolved.

Primitive people needed to recognize and locate fresh plants easily, because they depended for survival on wild food. That aspect of man's existence has disappeared, but civilization has not replaced the inherent need of humans to surround themselves with green. In a growing number of instances, a green security blanket is provided by houseplants.

"Houseplants are like pets to many people," says Dr. Renatus Hartogs, Associate Director of the American Institute for Psychotherapy and Psychoanalysis in New York City. "There is no danger from them. They don't stab you in the back. They provide companionship."

Perhaps, more important, says Dr. Hartogs, is that green plants provide a vital link with nature, especially for those in urban neighborhoods where concrete and brick provide the dominant decorative theme.

"Plants are more important for the city dweller because they give the person who lives in the city the illusion that he or she can return to nature at any time. Many people who are caught in poor, inadequate neighborhoods like a green plant because it shows them that they have not lost contact with nature."

Dr. Hartogs said that when urban apartment dwellers see a plant survive, "they have reason to hope they too will be able to survive." People today must constantly worry about their future, their survival, their competence, and they feel helpless.

"Tending plants gives people a feeling of being in control of a part of reality, of having the power to give life and make things grow," he said.

Using plants in therapy stretches back several hundred years and is growing across America today. Dr. Hartogs gives his patients plants to care for. "They relate to the plants," he says. "They develop a special relationship to them. This relationship, in turn, helps them to come out of themselves."

The National Council for Therapy and Rehabilitation Through Horticulture, located in Washington, D.C., has pools of information and develops ideas on how everyone can benefit from working with green plants. Their chief clients are the elderly, the handicapped, and mentally and emotionally disturbed and the mentally retarded.

Businessmen have also learned the value of green (and not only in the form of money) to their employees. The new headquarters of the John Hancock Mutual Life Insurance Company in Boston will open in April. The building will contain 3,000 plants which require two or three full-time caretakers.

Hard-nosed businessmen don't waste money on frills. They know plants enhance office buildings and provide the "green" feeling that employees need to function. Such office landscaping is taking the place of metal and plaster partitions.

The color green signifies more than just comfort and companionship. Green is the color of nourishment. Indeed, it's almost as if nature intended us to recognize green vegetables as the most nutritious because the darker the vegetable the better it is nutritionally.

Lettuce, the most popular salad green found on American tables, is an example. Iceberg, Boston, Bibb and Romaine varieties of light green lettuce contain relatively few nutrients when stacked up against darker greens, such as beet, collard, dandelion, mustard and turnip.

These five amazingly nutritious vegetables graced the tables of our Colonial forefathers who ate them out of some kind of instinct since they didn't have analytical chemists around to figure out the nutrients in food. Mustard greens have eight times more vitamin A and three times more vitamin C than lettuce, as well as more calcium, more riboflavin and more niacin.

Green is a good color. It's a welcome one. Everyone should have green in their lives. Bring it into your environment in the form of plants. Put it into your diet. Your mental and physical well-being are at stake.

xxx

Twin Valley Young Farmers square dance set danced at the Farm Show Tuesday evening the 7th. The couples are from left to right: Richard and Barbara Kurtz; Melvin Houck and Janet Moore; Robert Stoltzfus and Beth Swartzentruber; Frank and Irene Stoltzfus.

Square Dancers Compete During Pa. Farm Show

Participating in the Folk Dance Festival and contest at the Harrisburg Farm Show Tuesday evening were four couples representing the Twin Valley Young Farmers. The four couples making up the square dance set and representing the Twin Valley Young Farmers were: Richard and Barbara Kurtz; Frank and Irene Stoltzfus; Robert Stoltzfus and Beth Swartzentruber; and Melvin Houck and Janet Moore.

The square dance contest is divided into three divisions, division A which is for anyone under 17 years of age, division B which is for anyone between the ages of 15 and 25 years and division C where any age or combination of ages may particiapte. The set's division was B and their square dance number of 29 out of the 60 total sets that were there.

The square dance program is designed to encourage participation and elevate the standards of performance in Folk Dancing.

Each set that is there is costumed in their own unique way, and there is none that is exactly the same. The Twin Valley Young Farmers set was uniformily and attractively costumed in red and white checkered skirts, white blouses and crenelins for the women and white shirts, navy pants, red and white checkered vests and black bow ties for the men.

Sponsors from the area who made contributions for the square dance set's costumes were:

Carl Wingard Inc., Elverson Bank, Joanna Store, Elverson Supply, Meadowoode Farm owned by Frank and Ruth Houck, Martin's Western Auto, Weaver's Orchard, Schlimmes' Garage, Lammey's Store and Swartzentruber's Garage.

The Young Farmers would like to express their sincere appreciation for the support given by these businesses.

Zurin Receives Corn Award

Special recognition for his ability as a corn grower has been given to Kenneth E. Zurin of Mt. Joy, by The Producers of Funk's G-Hybrids.

His documented 1974 yield of 157.3 bushels per acre (adjusted to No. 2 corn - 15.5 percent moisture) was made with Funk's G-4646. The yield was entered in Funk's-G Project: 200 national high-yield corn growing contest. Announcement of the award was made by James McNeil of Mt. Joy, representing A. H. Hoffman Seeds, Inc.

Project: 200 was designed to challenge growers to increase corn yields for greater productivity and profit. Yield results and the agronomic practices used to achieve them are then shared with corn growers everywhere. More than 15,000 U.S. and Canadian growers have entered Project: 200 during the past three years, making it America's most meaningful high-yield corn growing contest.

Zurin's yield of 157.3 bushels per acre was produced on 2.2 acres. He planted the Project: 200 corn on April 30 in 30-inch rows at the rate of 22,100 kernels per acre. His fertility program consisted of 128 pounds of nitrogen, 144 pounds of phosphate and 72 pounds of potash per acre. Zurin used herbicides and an insecticide.

The Funk's G-4646 was harvested on November 9 when the moisture content was 21.8 percent. Plant population was 21,900.

To qualify for Project: 200, participants harvest as shelled corn a minimum of two acres from not less than four rows running the full length of the field. Information contained in the entry was verified by a reputable, disinterested witness.

A computerized summary of Project: 200 agronomic information is made available to corn growers each year by Funk Seeds International, Inc. With this information, corn growers can compare their growing methods to those used by other top producers.

Fur collars, cuffs or hats can be cleaned using a simple household formula. In a well ventilated room, mix 3/4 cup corn starch with 1 tablespoon household dry cleaning solvent in a bowl. Place the fur piece flat on brown paper. Spread on the mixture with fingers, rubbing it into the fur. Let it stand for about 20 minutes, rubbing it occasionally. As mixture absorbs dirt, it will turn grey. Remove dirt with vacuum cleaner, using the upholstery attachment or take the garment outdoors and shake and brush it well until completely clean.

CONTROL CATTLE LICE
with WARBEX* Pour-On
WARBEX breaks the life cycle of lice during the feeding stage . . . before they reach egg-laying maturity. Single treatments offer long-lasting protection, with no set-back to cattle.
WARBEX is easy to use, because it's ready to use. No spraying, no dipping; you simply pour it along the animal's back.
Lice-free cattle gain faster, convert more feed into more beef, can quickly return more than your investment in WARBEX.
WARBEX really works.

York Co. FFA Elects Officers

The York County FFA Mass Meeting was held November 19, 1974, and was called to order by President Keith Sechrist, Rose Kline gave the Secretary's report and Stewart Knaub gave the Treasurer's report.

The first item discussed under new business was whether or not to increase dues. The members voted to keep them at 40 cents. The members also voted to send the president and vice president to the summer convention as delegates.

The officers had placed a display which won 1st place prize in the York Fair. The members decided to give the 50 dollars prize money to the Carroll F. Thompson Scholarship Fund. The last of the new business was that the FFA voted to buy a Sweetheart crown, sash, and jacket.

At this time the County FFA Sweetheart, Deb Sweitzer, was introduced.

The county officers than held the White Rose Degree Ceremony, and recipiants received their degrees. The Star White Rose Degree Trophy went to Dave Miller from Red Lion.

The awards for dairy cattle and livestock judging contest were given Also the awards for public speaking, salesmanship, agronomy, small gas engine's, and flower arranging contests were given out. The parliamentary procedure team and farm mechanics skills awards were given out also.

Then, the initiation of new officers was held. They were as follows: President - Lamar Miller, Southwestern; Vice-President - Dave Miller, Red Lion; Secretary Palmer Kauffman, Red Lion, Treasurer - Jim Sizemore, Kennard-Dale; Reporter - Scott Hunt, Eastern; Sentinel - Cheryl Mummert, Vo-Tech; Chaplain - Dan McGregor, Dover; and Parlimentarian - Harold Stoneberg, Northern.

President Miller read his acceptance speech and President Sechrist read his retiring speech. The meeting was then closed and refreshments were served.

Ronald Nolt, son of Mr & Mrs Paul Nolt, RD1 Mount Joy, placed third (3rd) in the Tractor Safety Contest at the Pennsylvania Farm Show Ronald is a member of the Central 4-H Tractor Maintainance Club

The contest is to demonstrate safe and skillful practice in the operation of a farm tractor

Record Keeping Meeting Set

Farm Record Keeping will be the educational topic of the Twin Valley Young-Adult Farmers at the January 21st meeting Speakers for the program will be Mr Richmond (Dick) Young, Agway Farm Consultant, and Mr. Glenn Beam, a Certified Public Accountant.

Mr. Beam will speak on "Save Tax Dollars with Good Bookkeeping." His presentation will illustrate how to use records for tax purposes with many helpful hints included.

Mr Young will speak on "Analyzing Farm Records" He will explain how to use records to evaluate and improve your operation, and how to determine your rate of return on money invested

Record keeping is usually a joint husband and wife affair. Therefore, wives are encouraged to attend this program along with their husbands

The program will begin at 7:30 p m in the vocational agriculture classroom of the Twin Valley High School All programs of the Twin Valley Young-Adult Farmers are educational in nature and open to anyone interested in agriculture or its related occupations

Sixth National Charolais Show Slated

Approximately 1,000 producers of Charolais, the nation's fourth largest beef breed, will converge on Jackson, MS, Feb. 9-14 for the 18th annual meeting and sixth national show of the American - International Charolais Association.

Meeting for the first time in Mississippi, the breeders will represent most of the 50 states and several foreign countries, including Canada and Central America. Headquarters for the session will be the Jackson Hilton Hotel.

One of the higlights of the activities will be the National Charolais Show, to be held in conjunction with the Dixie National Feb. 10. Entries are expected to exceed 150 animals, representing some of the nation's leading breeding establishments. Judge for the show will be breeder Marvin Nichols of Ankeny, Iowa.

The first two days of activities following the National Show will be business sessions of workings committees and the association's Board of Directors. These areas of work, which involve planning a program of work for 1975, will be in promotion, performance, breed improvement, youth activities, shows feeder cattle, commercial, Charbray, and similar programs.

One of the highlights of the Wednesday, Feb. 12, schedule will be two purebred Charolais sales in the Hilton Ballroom. The first, the second annual Sale of Sires will feature the auction of 20 leading Charolais herd bull prospects, to start at 4:00 p.m. The second sale will be an offering of females by members of the Mississippi Charolais Breeders Assn., a promotional affiliate of the national organization. The latter sale begins at 7:00 p.m.

Election of officers and directors for 1975 will highlight the annual membership meeting on Thursday, Feb. 13. Included in these is Harlan Rogers of Collins, who currently is first vice president of the association and who has been recommended by the nominating committee for advancement to president of the association.

Other current officers of the association are Howard Johnson, Kansas City, MO, president; Harold Demorest, Waldo, OH, second vice president; Tom Prescott, Jerome, ID, secretary, and Nicoli Nicholas, Nicolaus, CA, treasurer. Johnson automatically becomes ex officio member of the board for one year. Other officers have been recommended for advancement to the next highest position.

Special social activities have been planned by the Mississippi Charolais Breeders Assn., the host organization. Marcus Martin of Brandon, MS, a member of the AICA Board of Directors, is president. Among those activities are a Mardi Gras dinner-dance Tuesday evening Feb. 11, and special ladies events during the week, including a tea at the governor's mansion Feb. 12. A special luncheon at the Hilton is planned for the ladies Feb. 13.

Mississippi's Lt. Governor, Jim Buck, will address the convention Feb. 13, followed by a presentation on the utilization of Charolais bulls in crossbreeding programs by Dr. Noah England of West Plains, MO, formerly manager of a large commercial ranching operation in Louisiana.

Guernsey Breeders Meet

A meeting of the Lancaster County Guernsey Breeders was held on January 2nd at the home of Robert Wagner's in Quarryville.

The following breeders were elected as officers: Fred Crider, Nottingham R2 - president; Bob Wagner, Quarryville R2, - vice president; Art Breneman, Willow Street R1, secretary-treasurer; J. Scott Wolf, Quarryville R2 - DHIA representative and Jesse Balmer, Lititz R4, - State Director.

The tour committee is presently working on a trip for the spring.

Weaver Receives Safety Award

Victor F. Weaver, Inc. New Holland, PA, has received the Pennsylvania Manufacturer's Association Insurance Company's "Million Mile" plaque in recognition of the Weaver Delivery Fleet's outstanding highway safety record. The fleet accumulated 1,000,000 miles of accident-free driving from April 26, 1974 through October 25, 1974.

David W. Klonicke, P.M.A. Loss Prevention Consultant presented the award to Carl Burkholder, Weaver Dispatcher; Luke Sauder, Safety Supervisor; and John Kennel, Manager of Company Services.

"We extend our sincerest congratulations to the drivers of the Weaver Delivery Fleet on their outstanding contribution to highway safety," said Klonicke. "Dedicated drivers such as these set a fine example for all users of the highways to follow."

Before you buy any farm loader, see a Bobcat in action!

It's no accident that Melroe's Bobcat is the world's most popular farm loader. For almost 20 years these powerful little loaders have been taking the backbreaking, time consuming labor out of dozens of farm jobs. Four Bobcat models, all with 4-wheel drive, pivot turning agility and a big assortment of special job attachments give farmers a wide range of applications and power options. Fitted with the exclusive Bob-Tach, Bobcat becomes a quick-change specialist in scores of indoor-outdoor, year-round jobs. Almost anyone can learn to operate a Bobcat in 15 minutes. And it's economical to maintain. We'd like to show you right on your farm how great a compact loader can be. Give us a call. While we're demonstrating, we'll show you how it's easier than ever to own or lease a Bobcat.

Growth Promotants For Sheep Studied

A recent trial conducted at The Pennsylvania State University by L. L. Wilson, Professor of Animal Science and J. Wiggins, Graduate Assistant, indicate that stilbestrol (DES) and zeranol promoted about the same increase in lamb growth rate. However, zeranol had no effect on carcass composition while DES increased the fat cover.

The rising costs of food production make it necessary to find methods to increase the amount of meat per pound of feed. Since it was first approved for use in 1955, DES has been used widely to increase feed efficiency and promote gains in both beef cattle and sheep. It is possible that DES may again be removed from use in livestock production and thus other growth promotants are being evaluated and compared to DES. One of these newer products, zeranol, appears to promote growth and feed efficiency about the same as DES, but functions differently in the animal's body.

The research results indicated that increasing the level of zeranol implantation above the recommended level may increase gains and provide greater feed efficiency than the normal dosage. These results also indicate that even at eight times the normal level, carcass and muscle composition were not affected.

A microscopic analysis of certain tissues indicates there are some estrogenic effects on reproductive tissues at extremely high dose levels. However, studies at other Universities indicate that there is very little chance of zeranol retention in body tissues or of undesirable effects of any kind when recommended 12-mg implants were used. These results also indicate that certain endocrine glands probably are involved in the growth promotion and feed efficiency.
